Teccor® Brand Thyristor

Alternistor Triacs 6.0 ~ 40.0 Amps

General Description: Teccor's Alternistor Triac has been specifically designed for applications which are required to switch highly inductive loads. To accomplish this, a special chip has been designed which effectively offers the same performance as two thyristors (SCRs) wired inverse parallel (back-to-back), hence, the alternistor has better turn-off behavior than a standard triac.

Internally Triggered Quadrac® Triacs (4.0 ~ 15.0 Amps)

General Description: QUADRAC is a triac that includes a diac trigger mounted inside the same package. This device saves the user the expense and assembly time of buying a discrete diac and assembling in conjunction with a gated triac. QUADRAC is a bidirectional AC switch and is gate controlled for either polarity of main terminal voltage. Its primary purpose is for AC switching and phase control applications such as speed controls, temperature modulation controls, and lighting controls.

Features: • Glass passivated junctions • Electrically isolated package • Internal trigger diac • High surge capability - up to 150 Amps • High voltage capability - 200 up to 600 volts • IDRM @25°C: .05mA • VTM @25°C: 1.6V • Capacitance: 0.1µF • tgt: 3µsec. **Electrical Isolation:** Isolated TO-220 Quadrac package will withstand a minimum high potential test of 2500VAC (RMS) from leads to case over the operating temperature range of the device. **Electrical Isolation From Leads to Case:** U.L. Recognized File No. 71639

‡ No snubber network required, best dv/dt and noise immunity.

Sidacs

Sidac is a sillicon bilateral voltage triggered switch with greater power-handling capabilities than standard diacs. Upon application of a voltage exceeding the sidac breakover voltage point, the sidac switches on through a negative resistance region to a low on-state voltage. Conduction continues until the current is interrupted or drops below the minimum holding current of the device. Junction temperature range (T_J) is -40°C ~ 125°C. **Application:** High Voltage Ignition sources.

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Multiple pinout configurations available, see Digi-Key website for data sheet.

MOSFETs

Multiple pinout configurations available, see Digi-Key website for data sheet.

Alpha & Omega Semiconductor (AOS) has a portfolio of approximately 400 products making AOS a well known, high volume, global supplier of Power MOSFETs. This diverse product range includes both N and P channel technologies in popular industry standard packages from the small form factor SC-89, to the robust TO-220. In addition AOS boasts some unique advanced low R_{DS}(on) surface mount packages for demanding high current density designs. These packages are designed to complement AOS' latest highly efficient MOSFET processes such as SRFET™ and SDMOS™. Through an in depth understanding of customers' applications these products are optimized to support the Power Management requirements of the Computing, Consumer, Communications and Industrial Market Segments.

Note: For additional information please see manufacturer's data sheet

ABSM2 Series — 12.5 x 4.6 Molded Plastic SMD Crystals

Specifications:

- **Frequency Stability:** ±50ppm Max., 10°C ~ 60°C
- **Frequency Tolerance:** ±30ppm
- **Operating Temperature:** -10°C ~ 60°C
- **Load Capacitance:** 18pF

(Continued)

ASFL1 Series — 5.0 x 3.2 SMD Oscillators

Specifications: • **Frequency Stability: EC:** ±50ppm; -20°C ~ 70°C; **EK:** ±30ppm; -20°C ~ 70°C • **Operating Temperature:** -20°C ~ 70°C • **Supply Voltage:** 3.3V ± 10% **Features:** • Seam sealed package

Dim. in mm.

ASFL3 Series — 5.0 x 3.2 SMD Oscillators

Specifications: • **Frequency Tolerance:** ±30ppm • **Operating Temperature:** -20°C ~ 70°C • **Load Capacitance:** 15.0pF • **Supply Voltage:** 1.8V ±10% **Output:** CMOS 15pF **Features:** • Low current consumption • Tri-State output

Dim. in mm.

ASDM Series — 2.5 x 2.0 SMD MEMS Oscillators - “Low Cost Oscillators”

Digi-Reel®

Specifications: • **Frequency Tolerance:** ±50ppm • **Operating Temperature:** -40°C ~ 85°C • **Supply Voltage:** 3.3V ±0.3V
Features: • Ultra Miniature Pure Silicon™ Clock Oscillator, MEMS Technology by Discera. • Suitable for high shock resistance, Industrial, Consumer, COTS military applications

Dim. in mm.

ASML Series — 14 x 10 SMD Oscillators

Digi-Reel®

Specifications: • **Frequency Tolerance:** ±100ppm • **Operating Temperature:** 0°C ~ 70°C • **Supply Voltage:** 3.3V ±10%
Features: • HCMOS and TTL compatible • Tri-State output

Dim. in mm.

AOCJY Series SMD OCXOs

Applications: • Cellular infrastructure • Radar systems • Test and measurement equipment • GPS tracking with precision hold-over accuracy • WiMax/WLAN **Specifications:** • Operating Temperature Range: **E:** -20°C ~ 70°C; **F:** -40°C ~ 75°C; **No Suffix:** 0°C ~ 50°C ***Note:*** *For additional specifications, please see manufacturer's data sheet*

Dim. in mm.

CSX-750V Series Voltage Controlled Crystal Oscillators

RoHS COMPLIANT Digi-Reel®

Specifications:
• **Supply Voltage:** *CSX-750VJ:* 5.0V ±0.5; *CSX-750VK:* 3.3V ±0.3 • **Frequency Stability:** ±50ppm • **Pullability:** *CSX-750VJ:* ±100ppm; *CSX-750VK:* ±90ppm • **Output Current:** 10mA • **Operating Temperature:** -20°C ~ 70°C • **Duty Cycle:** 45% Min., 55% Max.

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

CITIZEN Micro HumanTech

CM309 Series Crystals

Digi-Reel®

Specifications:

- Frequency Tolerance: ±30ppm
- Frequency/Temperature: ±50ppm, -10°C ~ 60°C
- Operating Temperature: -40°C ~ 85°C
- Storage Temperature: -55°C ~ 125°C
- Load Capacitance: 18.0pF
- Shunt Capacitance: 7pF
- Drive Level: 50µW ~ 100µW
- Insulation Resistance: 500MΩ Minimum
- Aging (First Year): ±5ppm Maximum

CMR250T Series Crystals

Specifications:

- Frequency Tolerance: ±30ppm
- Operating Temperature: -40°C ~ 85°C
- Storage Temperature: -55°C ~ 125°C
- Load Capacitance: 12.5pF
- Shunt Capacitance: .8pF ~ .7pF
- Drive Level: 1µW Max.
- Insulation Resistance: 500MΩ Min.
- Aging (First Year): ±5ppm Max.

HC49US Series Through-Hole Crystals

Specifications:
• Frequency Tolerance: ±30ppm • Operating Temperature: -20°C ~ 70°C • Storage Temperature: -40°C ~ 85°C • Load Capacitance: 18.0pF • Shunt Capacitance: 7pF Maximum • Drive Level: 100µW Maximum • Insulation Resistance: 500MΩ Minimum • Aging (First Year): ±5ppm Maximum

ECS INC. INTERNATIONAL Programmable Oscillators

The ability to create a custom oscillator to certain specifications provides engineers with a great deal of flexibility. They allow for last minute changes in circuitry or design. ECS Blanks are "Twice Programmable". This is a cost saving feature which allows you to reprogram the same part to different specifications. ECS Programmable Oscillators are available in five different package styles: 3.2 x 5.0 SMD, 5.0 x 7.5 SMD, 9.0 x 14.0 SMD, Half Size Dip and Full Size Dip Package. Frequency ranges are available from 1MHz ~ 125MHz in 3.3V and 1MHz ~ 150MHz in 5V* and in ±50ppm** and ±100ppm Frequency Stability Options.

*3.2 x 5.0 SMD package: Frequency range 1MHz ~ 125MHz in 5V.

**±50ppm not available in Extended Temperature Range Option.

How to Select a Base Part Number:	
#1	Select Part Type
#2	Select Output Voltage
#3	Select Frequency Tolerance / Operating Temperature

† Call Digi-Key with your Selected Base Part Number, and a Sales Representative will enter your desired frequency.

Programmable parts are non-cancelable and non-returnable!

Example Part Number:
ECS □□□-□□-ND

#1	Part Type
P5	3.2 x 5.0 mm
P7	5.0 x 7.0 mm
P8F	9.0 x 14.0 mm
P8	8 Pin Dip
P14	14 Pin Dip

#2	Output Voltage
3	3.3V
5	5V

#3	Frequency Tolerance (Operating Temperature)
A	±100ppm (0°C ~ 70°C)
AN	±100ppm (40°C ~ 85°C)
B	±50ppm (0°C ~ 70°C)

CrystalPro Oscillator Programming System

Programmer

Designed specifically to program oscillator devices, the CrystalPro is a fast, accurate, low cost solution for your low to mid volume programming needs. Software and firmware upgrades can be downloaded off the web to support future parts from manufacturers and new technologies such as programmable TCXO and VCXO devices.

The user-friendly CrystalWindow graphical interface insures complete and valid part specification and fast part type switching. Attaches to any Windows PC via standard serial port.

Features:

- Fast - average programming is less than two seconds.
- Accurate frequency at time of programming cycle is within 5ppm.
- Simple - just select part number, type in desired frequency and click PROGRAM.
- Flexible - handling devices up to 250MHz and LVTTL/TTL/CMOS/ECL/PECL I/O technologies, the CrystalPro is designed to handle tomorrow's technologies as they become available.

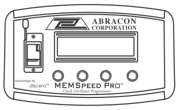
MEMSpeed Pro™ Oscillator Programming Kits

MEMSpeed Pro Programmer



Dimensions: 6.0" x 3.5" x 1.0"

MEMSpeed Pro Deluxe Kit:

Includes: • MEMSpeed Pro Programmer • Two Socket Adapters *(5.0mm x 3.2mm and 3.2mm x 2.5mm)* • USB Cable • Tweezers • Quickstart Guide and CD-ROM for PC Installation • 200 unprogrammed blank Oscillators *(100pcs. of 535-10059-ND and 100pcs. of 535-10060-ND)*

535-10056-ND (MEMSPEED PRO DELUXE KIT) **$499.00**

MEMSpeed Pro Standard ASFLM Kit:

Includes: • MEMSpeed Pro Programmer • Socket Adapters *(5.0mm x 3.2mm)* • USB Cable • Tweezers • Quickstart Guide and CD-ROM for PC Installation • 50 unprogrammed blank Oscillators *(535-10059-ND)*

535-10057-ND (MEMSPEED PRO ASFLM KIT) **$315.00**

MEMSpeed Pro Standard ASEM Kit:

Includes: • MEMSpeed Pro Programmer • Socket Adapters *(3.2mm x 2.5mm)* • USB Cable • Tweezers • Quickstart Guide and CD-ROM for PC Installation • 50 unprogrammed blank Oscillators *(535-10060-ND)*

535-10058-ND (MEMSPEED PRO ASEM KIT) **$315.00**

Blank Replacement Oscillators

ASFLM and ASEM Oscillators are unprogrammed blank replacement oscillators for MEMSpeed Pro Programming Kits.

Programmable parts are non-cancelable and non-returnable!

CARDINAL COMPONENTS, INC.

FIPO™ Field Instantly Programmable Oscillators

RoHS COMPLIANT

The **CPP Series** is a Standard series and is available in Styles 1, 4, 5, 7 and 8. The frequency range is 1.000MHz ~ 133.000MHz for 5V and 1.000MHz ~ 100.000MHz for 3.3V. The **CPPL Series** is an Ultra Low Jitter series and is available in Styles 1, 4, 5, 7 and 8. The frequency range is 1.000MHz ~ 133.000MHz for 5V, 1.000MHz ~ 100.000MHz for 3.3V

The **CPPFX Series** is an Extended Temperature, High Stability series and is available in Style 7 only. The frequency range is 1.000MHz ~ 133.000MHz for both 5V and 3.3V. The temperature range is -40°C ~ 85°C and the frequency stability is ±25ppm.

8	Plastic SMD

CPPFX Available in 5 x 7 only.

#3	Voltage
H	5 Volt
L	3.3 Volt

H = 1 thru 133MHz
L = 1 thru 100MHz

#4	Packaging
T	Tube
Z	Tape & Reel

Package style 1 and 4 available in tube packaging only. Package style 7 and 8 available in tube and tape & reel

#5	Operating Temp.
0	0°C ~ 70°C
5	-20°C ~ 70°C
7	-40°C ~ 85°C

CPPFX available in -40°C ~ 85°C only.

#6	Stability
6	±100ppm
P	±50ppm
R	±25ppm

R not available in -40°C to 80°C CPPFX available in ±25ppm only.

#7	Function
T	Tri-State
P	Power Down

Tri-State Mode – The output of the part is weakly pulled low when the control pin goes low. The active circuitry continues to operate, allowing a rapid return to normal operation when the control pin goes high.

Power Down Mode – When the control pin goes low, all active circuitry on the chip within the oscillator is shut down. For reactivation, time in which the part regains its output is minimal.

How to Select a Base Number:

# 1 = Select Output
# 2 = Select Package Style
# 3 = Select Voltage
# 4 = Select Packaging
# 5 = Select Operating Temp.
# 6 = Select Stability
# 7 = Select Function

* Call Digi-Key with your selected Base Part Number, and a Sales Representative will enter your desired frequency.

SILICON LABS

Silicon Oscillators — Differential Output or Single-Ended Output

RoHS COMPLIANT

Features:
• Quartz-free, MEMS-free, and PLL-free all-silicon oscillator • Any-rate output frequencies from 0.9 ~ 200 MHz • Short lead times •Excellent temperature stability (±20 ppm) • Highly reliable startup and operation • High immunity to shock and vibration • Low jitter: <1.5 ps • 0°C ~ 85°C operation includes 10-year aging in hot environments • Footprint compatible with industry-standard 3.2 x 5.0 mm XOs • CMOS and SSTL versions available • Driver stopped, tri-state, or powerdown operation • 1.8, 2.5, or 3.3V options • Low power • More than 10x better fit rate than competing crystal solutions

Type	Digi-Key Base Part No.*	Price Each 1	10	50

EPSON TOYOCOM SG8002 Programmable Oscillators

The SG-8002 Series gives you the flexibility to solve many different application problems with a one time programmable device. Programmable Oscillators provide the ability to pick a custom frequency in one of seven different packages available in SMD and Thru-Hole styles. All packages are pin compatible with the Epson SG-645, SG-636, SG-615, SG-531, SG-51, SG-710 and SG-310 Oscillators.

◊ Not available in JC Package

How to order:

#1 — Select Package
#2 — Select Function
#3 — Select Power Supply Duty Level
#4 — Select Frequency Stability and Operating Temperature

Call Digi-Key with your Base Part Number and an Operator will enter your desired frequency.

Available Frequency Range: 1.000MHz ~125.000MHz (except for those listed below)

SG-8002CA/DB/DC/JA: PHM/PTM/SHM/STM: 1.000MHz ~ 55.000MHz
SG-8002JF: PHM/PTM/SHM/STM: 1.000MHz ~ 40.000MHz
SG-8002CE: PHM/PTM/SHM/STM: 1.000MHz ~ 27.000MHz

Parts coming from Digi-Key are marked with Manufacture Date Lot Code only.
Fully marked parts are available as a non-catalog order.

One Time Programmable parts are non-cancelable, non-returnable!

Recommended Soldering Pattern

Specifications:	SG-615P	SG-615PTJ	SG-615PH	SG-615PCV	SG-615PCG
Supply Voltage	5V±.5V			2.7V ~ 5.5V	2.7V ~ 3.6V
Storage Temperature	-55°C ~ 125°C				
Operating Temperature	-20°C ~ 70°C			-10°C ~ 70°C	-40°C ~ 85°C
Frequency Stability	Parts ending in MB ±50ppm, MC ±100ppm				
Current Consumption	23mA Max.	35mA Max.		50mA Max.	12mA Max.
Output Disable Current	12mA Max.	28mA Max.	20mA Max.	27mA Max.	10mA Max.
Oscillation Start-up Time	4ms Max.	10ms Max.			12ms Max.
Duty					
CMOS	40% ~ 60%	—	40% ~ 60%	35% ~ 60%	45% ~ 55%
TTL	40% ~ 60%	45% ~ 55%	—		
Output Voltage					
VOH	Vcc -.4V Min.	2.4V Min.	Vcc -.4VMin.	Vcc -.5V	Vcc -.4VMin.
VOL	.4V Max.				
Output Enable / Disable Input Volt.					
VIH	2V Min.	3.5V Min.	2V Min.	.7V Min.	70% Vcc Min.
VIL	.8V Max.	1.5V Max.	.8V Max.	.2V Max.	20% Vcc Max.
Output Fall Time					
CMOS	8ns Max.	—	7ns Max.	4ns Max.	
TTL	8ns Max.	5ns Max.	—

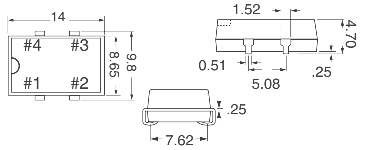
Voltage Controlled Crystal Oscillators (VCXO) VG-1011JA Series



Pin Connection	
1	VC
2	GND
3	Out
4	Vdd

Features: • Reflowable and high density • SMD mounting • Using the heat-resisting type AT cut quartz crystal allows almost the same temperature soldering as universal SMD IC • Using C-MOS IC allows low current consumption and assures high reliability

Specifications: • **Frequency Adjustment Range:** ±75ppm • **Frequency Control Sensitivity:** 2.5, ±2.0V, ±10% • **Supply Voltage:** 5V ±.5V • **Operating Temperature:** -20°C ~ 70°C • **Storage Temperature:** -55°C ~ 125°C • **Frequency Tolerance:** ±20ppm • **Supply Current:** 13mA • **Output Voltage:** .4V (VOL) • **Output Current:** -0.8mA IOH; .8mA IOL • **Duty @ CMOS Level (VDD/2):** 40% ~ 60% • **Control Voltage:** 4.5V ~ 5.5V • **Fall Time:** 8ns • **Rise Time:** 8ns

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

EPSON TOYOCOM CMOS/TTL Oscillators

Features: • High reliability by cylinder type AT Crystal • Automatic mountable • Lower current consumption by C-MOS IC • TTL-10 output load by using C-MOS IC • DIP 14-pin plastic package compatible with metal package oscillator • DIP 8-pin plastic package compatible with half size metal package oscillator

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

EPSON TOYOCOM Surface Mount Quartz Crystal Products

Features: • Capable of withstanding reflow temperatures of 260°C for 20 seconds • Suitable for use in today's high density surface mount boards

CTS® 400 Series SMD Crystals

Features: • Stable frequency over temperature and drive level • Ideal for application to high-density circuit boards. • Reliable precision and excellent shock performance in wireless telecommunications devices

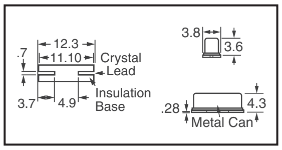
✔ ***NEW!*** † For Tape and Reel part number change CT-ND to TR-ND.

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

CTS® ATS-SM Series Crystals



Specifications:

- **Frequency Tolerance:** ±30ppm @ 25°C
- **Shunt Capacitance:** 7.0pF Maximum
- **Max Drive Level:** 1,000mW
- **Frequency Stability:** ±50ppm
- **Operating Temperature:** -20°C ~ 70°C
- **Operating Mode:** Fundamental

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

CTS CB3 Series 7.0 x 5.0 SMD Oscillators

Features:

- Standard miniature surface mount footprint
- PCMCIA Type II and III compatible
- HCMOS/TTL compatible
- 16mm Tape and Reel
- Ceramic construction for long-term reliability
- Seam welded and shielded with Kovar cover

MXO45 Clock Oscillators

Specifications: • **Frequency Stability:** ±50ppm • **Operating Temperature Range:** -20°C ~ 70°C • **Supply Voltage:** 5.0V • **Supply Current:** 1.0 ~ 20MHz: 10 ~ 25mA; 20.1 ~ 80MHz: 30 ~ 50mA • **Output Load CMOS:** 1 ~ 50MHz: 50pF; 50.1 ~ 80MHz: 30pF • **Output Load TTL:** 1 ~ 80MHz: 10TTL • **Output Current:** V_{OH}=3.9V: -16mA; V_{OL}=0.4V: 16mA • **Output Duty Cycle:** 45 ~ 55% • **Rise and Fall Time:** 1.0 ~ 50MHz: 8 ~ 10ns; 50.1 ~ 80MHz: 4 ~ 8ns • **Start Up Time:** 10ms • **Enable Input (V_{IH}):** 2V Minimum; **(V_{IL}):** 0.8V Maximum • **Enable Time:** 100ns • **Phase Jitter:** 1ps

Standard Output: Features: • CMOS/TTL compatible • Fully hermetically-sealed package • Standard 14-Pin or 8-Pin DIP footprint • Drives up to 10 standard TTL Loads

Tri-State Output: Tri-State Logic uses the two standard logic levels of high (logic 1) and low (logic 0) but has added a third state that is not a logic level but an open circuit condition that effectively disconnects the output from your circuit with a high impedance (floating) state, thereby enabling the use of numerous oscillators on the same bus line. Also, by using the enable pin to control the output, the crystal is still running even when the output is disabled (stand-by mode), thus eliminating any start-up time for the oscillator.

CTS HCMOS/TTL products utilize an Application Specific Integrated Circuit (ASIC) design strategy. Employing a single design family supporting both HCMOS/TTL applications helps in reducing costs and lead times. Utilizing ASIC technology reduces the number of components inside the XO (crystal oscillator), thus increasing reliability and further reducing cost. **Features:** • CMOS/TTL compatible • Drives up to 10 standard TTL loads • Fully hermetic resistance weld package

Surface Mount Crystals

Specifications:

CS-018 Series:
- Frequency Calibration: ±100ppm • Frequency Stability: ±100ppm • Temperature Range: -40°C ~ 85°C

CS-023 Series:
- Frequency Calibration: ±20ppm • Frequency Stability: ±20ppm • Temperature Range: -40°C ~ 85°C

XL-1C and XM-1 Series:
- Temperature Stability: ±50ppm • Frequency Tolerance: ±50ppm @25°C • Operating Temperature: -10°C ~ 60°C • Drive Level: 1mW Typical

VCO Evaluation Boards

Crystek's VCO Evaluation Boards are a turn key solution to easy stand alone testing. Evaluation boards are constructed using rigid 0.062" FR4 PCB material. Solder down connection method insures that the VCO will receive proper grounding for best testing results. Evaluation boards are available for 0.3" x 0.3" and 0.5" x 0.5" industrial standard VCO footprints.

Features:
• **Connectors:** Gold plated SMA female connectors • **Frequency range:** DC to 6GHz • **PCB:** 0.062" FR4 • **Operating temperature:** -40°C ~ 85°C

744-1269-ND (CEVAL-033) 0.30" x 0.30" VCO CVCO33**.... $37.73**
744-1270-ND (CEVAL-055) 0.50" x 0.50" VCO CVCO55**.... $37.73**

Note: For applications and additional specifications, please see the manufacturer's data sheets.
† For Tape and Reel part number, change 1-ND to 2-ND.

NX2520SA, NX3225SA, NX5032GA, NX8045GB, NX1255GB and NX3225GA Series

NX2520SA Series: Electrical Characteristics: • Frequency Tolerance (25±3°C): ±10ppm • Frequency Stability: ±10ppm • Operating Mode: Fundamental • Load Capacitance: 10pf • Operating Temperature: -10°C ~ 60°C • Drive Level: 10μW

NX3225SA Series: Electrical Characteristics: • Frequency Tolerance (25±3°C): ±15ppm • Frequency Stability: ±15ppm • Operating Mode: Fundamental • Load Capacitance: 8pf • Operating Temperature: -10°C ~ 75°C • Drive Level: 50μW

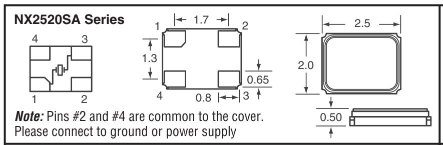
NX5032GA Series: Electrical Characteristics: • Frequency Tolerance (25±3°C): ±50ppm • Frequency Stability: ±50ppm • Operating Mode: Fundamental • Load Capacitance: 8pf • Operating Temperature: -10°C ~ 70°C • Drive Level: 50μW

NX8045GB Series: Electrical Characteristics: • Frequency Tolerance (25±3°C): ±50ppm • Frequency Stability: ±50ppm • Operating Mode: Fundamental • Load Capacitance: 8pf • Operating Temperature: -10°C ~ 70°C • Drive Level: 50μW

NX1255GB Series: Electrical Characteristics: • Frequency Tolerance (25±3°C): ±50ppm • Frequency Stability: ±50ppm • Operating Mode: Fundamental • Load Capacitance: 12pf • Operating Temperature: -10°C ~ 70°C • Drive Level: 100μW

NX3225GA Series: Electrical Characteristics: • Frequency Tolerance (25±3°C): ±20ppm • Frequency Stability: ±30ppm • Operating Mode: Fundamental • Load Capacitance: 8pf • Operating Temperature: -10°C ~ 70°C • Drive Level: 200μW

NX2520SA Series



Note: Pins #2 and #4 are common to the cover.
Please connect to ground or power supply

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

TXC

9C, 7A, 7B, 7M, 8Z and 8Y Series SMD Crystals

RoHS COMPLIANT

Digi-Reel®

Series	Frequency Stability Over Temp	Freq. Tolerance @ 25°C	Operating Temperature	Load Cap.	Shunt Cap.	Drive Level (Max.)
9C-XXXXMAAJ-T	±30ppm (-20°C ~ 70°C)	±30ppm	-40°C ~ 85°C	18pF	7pF	500μW
9C-XXXXMEEJ-T	±10ppm (-20°C ~ 70°C)	±10ppm	-40°C ~ 85°C	18pF	7pF	500μW
7A-XXXXMAAJ-T	±30ppm (-20°C ~ 70°C)	±30ppm	-40°C ~ 85°C	18pF	5pF	200μW
7B-XXXXMAAJ-T	±30ppm (-20°C ~ 70°C)	±30ppm	-40°C ~ 85°C	18pF	5pF	100μW
7B-XXXXMEEQ-T	±10ppm (-20°C ~ 70°C)	±10ppm	-40°C ~ 85°C	10pF	5pF	100μW
7M-XXXXMAAJ-T	±30ppm (-20°C ~ 70°C)	±30ppm	-40°C ~ 85°C	18pF	3pF	50μW
7M-XXXXMEEQ-T	±10ppm (-20°C ~ 70°C)	±10ppm	-40°C ~ 85°C	10pF	3pF	50μW
8Z-XXXXMAAJ-T	±30ppm (-20°C ~ 70°C)	±30ppm	-40°C ~ 85°C	18pF	3pF	100μW
8Z-XXXXMEEQ-T	±10ppm (-20°C ~ 70°C)	±10ppm	-40°C ~ 85°C	10pF	3pF	100μW
8Y-XXXXMAAJ-T	±30ppm (-20°C ~ 70°C)	±30ppm	-40°C ~ 85°C	18pF	3pF	200μW
8Y-XXXXMEEQ-T	±10ppm (-20°C ~ 70°C)	±10ppm	-40°C ~ 85°C	10pF	3pF	200μW

Mode of Operation:	9C Series ≤30.00MHz Fundamental Mode, >30.00MHz Third Overtone 7A, 7B, 7M, 8Z and 8Y Series are all Fundamental Mode

Dimensions in mm

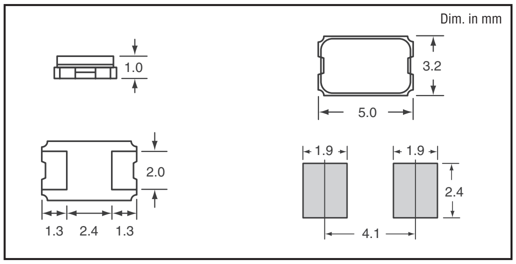
CX5032GB Series SMD Crystals



Features: • Crystal unit for audio-visual and office equipment • Small and low profile • Ceramic package • Reflow compatible
Applications: • Digital electronics • Audio-visual • Office equipment
Specifications: • Frequency Tolerance: ±30ppm • Frequency Temperature Characteristics: ±20ppm • Load Capacitance: 12pF • Operating Temperature Range: -10°C ~ 70°C • Storage Temperature Range: -40°C ~ 85°C

KC7050P Series LVDS and PECL SMD Oscillators

Features: • Miniature ceramic package • Highly reliable with seam welding • Supply Voltage Vcc: 3.3V **Specifications:** • Operating Temperature Range: 0°C ~ 70°C • Max. Current Consumption: 70mA (LVDS), 90mA (PECL) • Stand-by Current: 30µA • Rise/Fall Time: 0.6nS • Output Load: 100Ω (LVDS), 50Ω (PECL)

Ceramic Resonators Surface Mount

Features: • Constructed with ceramic package • High reliability against soldering heat and mechanical stress • Moisture-proof sealing • Stable against solvent cleaning • Designed for reflow soldering • Flat-bottom plate for better mountings **Applications:** • Clock generator for various microprocessers • Carrier between telecommunication equipment (telephone to telephone, personal computer to printer, etc.)

SAW Resonators — EFO-H Series

Capable of fundamental wave oscillation, and it is particularly suited for simplification, size reduction and stabilization of the circuit, compared with conventional LC oscillation and quartz crystal oscillation. **Features:** • Capable of fundamental oscillation • Superior temperature characteristics **Recommended Applications:** • Oscillation circuit for remote control (garage door opener, security system) • Various kinds of local oscillation circuit **Specifications:** • Operating Temperature: -20°C ~ 80°C • Maximum Frequency Drift: -150 ~ 50 ppm/°C (-20°C ~ 80°C) **1 Port Type:** • Resonant Resistance: 30Ω Maximum • Capacitance: 2.0pF ±0.5 **2 Port Type:** • Insertion Loss: 15dB Maximum • Loaded Q: 7,000 Minimum (5,000 Minimum for 418.0 frequency) • Capacitance: 1.3pF ±0.3 • Phase Shift: 180°

Ceramic Filters

SFECV10M7 Series for FM receivers are monolithic type ceramic filters which utilize the thickness expander mode of the piezoelectric ceramic.

† Bulk

Ceramic Discriminator

CDSCB and CDALF Series:
They form a resonator on a piezoelectric ceramic substrate. In combination with ICs, these types obtain stable demodulation characteristics in a wide bandwidth.

Ceramic Resonators — Leaded

Dim. in mm

Specifications: • Frequency Tolerance: ±0.5% • Operating Temperature Range: -40°C ~ 85°C
Features: • The FCR series provide a high degree of stability between the quartz oscillator and the LC or RC oscillating circuits • Temperature Characteristics: -20°C ~ 85°C

Ceramic Resonators — Surface Mount

Dim. in mm

Features: • These are thin type ceramic chip resonators • 3rd overtone thickness mode elements are used for both the 4.00MHz ~ 10.00MHz and the 16.93MHz ~ 48.00MHz band • Built-in load capacitance

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

EPCOS

SAW Resonators — Surface Mount

Applications: In remote control applications, SAW resonators provide stable frequencies for the RF carrier signal to transmit data over a range of 10-300m or for the local oscillators of superhet receivers.
Note: Tighter tolerances are available upon request.

SAW Filters — Surface Mount

Applications: The front-end SAW filter in the receiver eliminates interference from the incoming RF signal, thus increasing selectivity and sensitivity in short-range devices.
Note: Tighter tolerances are available upon request.

Digi-Reel® **Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.**

OCTA-PAC®/ECONO-PAC™ Power Inductors and Transformers

These parts are commonly used in reference designs for manufacturers like Linear Technology, Texas Instruments, On-Semiconductor™, Maxim, National Semiconductor™, Fairchild Semiconductor®, Analog Devices and many more.
Features: • Surface mount magnetics that can be used as single or coupled inductors or 1:1 transformers that provide isolation between two windings • OCTA-PACs are designed around high frequency, low loss MPP core material • ECONO-PACs are a lower cost version of OCTA-PACs offering high saturation flux density **Applications:** • Computer and portable power devices • LCD panels, DVD players • Inductor: DC-DC converters • Buck, boost, forward and resonant converters • Noise filtering and filter chokes • Transformers: 1:1 300Vdc isolation, flyback, sepic **Specifications:** • **Operating Temperature Range:** -40°C ~ 85°C (Range is application specific) **Solder Reflow Temperature:** 260°C for 10 seconds maximum

UNI-PAC™ and Amorphous Surface Mount Power Inductors

Features: These specified parts are designed for use in National Semiconductors Webench program, but are also used in many power applications like DC-DC converters and battery powered equipment. Miniature size with maximum power density and are rugged enough for design in high shock environments.
Specifications: • **Operating Temperature Range:** -40°C ~ 85°C • **Solder Reflow Temperature:** 260°C for 10 seconds maximum

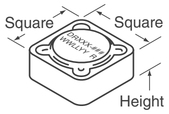
Shielded High Power Inductors — DR Series (SMD)

Digi-Reel® RoHS COMPLIANT



Series	Dimensions – Maximum (mm) Square	Height
DR73	7.6	3.55
DR74	7.6	4.35
DR124	12.3	4.50
DR125	12.5	6.00
DR127	12.5	8.00

Features: Designed for use in many power applications, DC-DC converters, LCD panels, Computer, DVD players and portable power devices.
Specifications: • Operating Temperature Range: -40°C ~ 125°C **• Solder Reflow Temperature:** 260°C maximum for 10 seconds maximum

Note (1): Open Circuit Inductance Test Parameters: 100kHz, 0.250Vrms, 0.0 Adc **Note (2):** RMS current for an approximate ΔT of 40°C without core loss. It is recommended that the temperature of the part not exceed 125°C. **Note (3):** Peak current for approximately 30% roll-off at 20°C **Note (4):** DCR limits at 20°C **Note (5):** Applied Volt-Time product (V-µS) across the inductor at 100kHz necessary to generate a core loss equal to 10% of the total losses for 40°C temperature rise.

Note (1): Open Circuit Inductance Test Parameters: 100kHz, 0.250Vrms, 0.0 Adc **Note (2):** RMS current for an approximate ΔT of 40°C without core loss. It is recommended that the temperature of the part not exceed 125°C. **Note (3):** Peak current for approximately 30% roll-off at 20°C **Note (4):** DCR limits at 20°C **Note (5):** Applied Volt-Time product (V-µS) across the inductor at 100kHz necessary to generate a core loss equal to 10% of the total losses for 40°C temperature rise.

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Shielded Low Profile, High Power Inductors – SD Series (SMD)

Specifications: • **Operating Temperature:** -40°C ~ 85°C • **Solder Reflow Temperature:** 240°C for 30 seconds maximum, 260°C for 10 seconds maximum for RoHS Compliant components

NEW! Power Factor Correction (PFC) Inductors

Implementing power factor correction (PFC) into switch mode power supplies will maximize: • The power handling capability of the power supply • Current handling capacities of power distributing networks

Two types of PFC's Include:

Passive PFC: The simplest form of PFC is passive (Passive PFC). A passive PFC uses a filter at the AC input to correct poor power factor. The passive PFC circuitry uses only passive components — an inductor and some capacitors. Although pleasantly simple and robust, a passive PFC rarely achieves low Total Harmonic Distortion (THD). Also, because the circuit operates at the low line power frequency of 50Hz or 60Hz, the passive elements are normally bulky and heavy.

Active PFC: Offers better Total Harmonic Distortion (THD) and is significantly smaller and lighter than a passive PFC circuit. To reduce the size and cost of passive filter elements, an active PFC operates at a higher switching frequency than the 50Hz/60Hz line frequency. Such topologies as buck, boost and flyback are used in active PFC circuits.

Dual Winding, Shielded Inductors/Transformers

DRQ/Low Profile — SDQ Series (SMD)

Features: Dual winding inductors can be used as either a single inductor, or in coupled inductor/transformer applications (1:1 turns ratio), offering a broad range of inductance and current ratings.

Specifications: • **Operating Temperature:** -40°C ~ 125°C (ranges are application specific) • **Solder Reflow Temperature:** 260°C maximum for 10 seconds maximum • **Isolation Between Windings:** 200VAC (DRQ Series); 500VDC (SDQ Series) • **Turns Ratio:** (1-2):(3-4) 1:1

Note (1): Open Circuit Inductance Test Parameters: 100KHz, 0.250Vrms, 0.0 Adc **Note (2):** RMS current for an approximate ΔT of 40°C without core loss. It is recommended that the temperature of the part not exceed 125°C. **Note (3):** Peak current for approximately 30% roll-off at 20°C **Note (4):** DCR limits at 20°C **Note (5):** Applied Volt-Time product (V-µS) across the inductor at 100kHz necessary to generate a core loss equal to 10% of the total losses for a 40°C temperature rise.

‡ For Tape and Reel part number, change 1-ND to 2-ND

Note (1): Open Circuit Inductance Test Parameters: 100KHz, 0.250Vrms, 0.0 Adc **Note (2):** RMS current for an approximate ΔT of 40°C without core loss. It is recommended that the temperature of the part not exceed 125°C. **Note (3):** Peak current for approximately 30% roll-off at 20°C **Note (4):** DCR limits at 20°C **Note (5):** Applied Volt-Time product (V-µS) across the inductor at 100kHz necessary to generate a core loss equal to 10% of the total losses for a 40°C temperature rise.

‡ For Tape and Reel part number, change 1-ND to 2-ND

Common Mode Inductors (SMD) – CMS Series

Specifications:
- **Operating Temperature:** -40°C ~ 160°C • **Isolation Voltage:** 300Vdc, Noise attenuation up to 44dB
- **Frequency Range:** Up to 100MHz • **Solder Reflow Temperature:** 260°C for 10 seconds maximum

Note (1): Open Circuit Inductance Test Parameters: 100kHz, 0.1V, 0.0Adc **Note (2):** DC current for an approximate ΔT of 30°C without core loss. **Note (3):** Peak for approximately 35% rolloff maximum (at 25°C)

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

COILTRONICS®

Low Profile Power Inductors
Shielded Drum Core (SMD)

RoHS COMPLIANT

Digi-Reel®

Specifications: • **Frequency Range:** up to 4MHz (Up to 300KHz for the SD3814 Series) • **Operating Temperature Range:** -40°C ~ 125°C (-40°C ~ 85°C for the SD3814 Series) • **Solder Reflow Temperature:** 260°C max. for 10 seconds maximum

Note (1): OCL; Open Circuit Inductance at no load, see data sheet for test parameters **Note (2):** I_{RMS}; Ampere rating for normal operation without core related losses **Note (3):** I_{SAT}; Saturation Ampere rating, see data sheet for percentage rolloff

---

High Current Power Inductors (SMD) —

HCF1305 Series

Specifications:

- **Frequency Range:** 100kHz ~ 1MHz
- **Operating Temperature Range:** -40°C ~ 125°C
- **Solder Reflow Temperature:** 260°C maximum for 10 seconds

Note (1): OCL: Open Circuit Inductance test parameters: 100kHz, 0.1Vrms, 0.0Adc. OCL @ -40°C can be lower than OCL @20°C by 15% max. **Note (2):** Irms: DC current for an approximate DT of 40°C without core loss. Derating is necessary for AC currents. PCB layout, trace thickness and width, air-flow, and proximity of other heat generating components will affect the temperature rise. It is recommended that the temperature of the part not exceed 125°C under worst case operating conditions verified in the end application. **Note (3)**: Isat1: Amperes Peak for approximately 30% rolloff (@25°C).

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

High Current Power Inductors (Thru Hole) — HCPT1309 Series

Specifications: • **Frequency Range:** up to 1MHz • **Operating Temperature Range:** -40°C ~ 105°C • **Solder Reflow Temperature:** 260°C for 10 seconds maximum

OCL(1) nominal +/- 20% (µH)	I_{RMS}(2) Amperes	I_{SAT}(3) Peak 30% Roll-off @ 20°C	DCR (mΩ) nom @ 20°C	Dimensions (mm) B	C	D	Digi-Key Part No.	Price Each 1	10	100	Coiltronics Part No.

Note: (1) OCL: Open Circuit Inductance test parameters: 100kHz, 0.1Vrms, 0.0Adc. **Note: (2)** IRMS DC current for an approximate ΔT of 40°C without core loss. It is recommended that the temperature of the part not exceed 105°C under worst case operating conditions. **Note: (3)** ISAT Amperes Peak for approximately 30% roll-off (@25°C) See data sheet for additional roll-off ratings.

Foil Technology, High Current Power Inductors (SMD)

Features: • Designed for high current, high frequency, low voltage applications where low DCR and high efficiency are needed.
Specifications: • **Operating Temperature Range:** -40°C ~ 125°C (HC1 Series) • **Operating Ambient Temperature Range:** -40°C ~ 85°C (HC2LP Series) • **Solder Reflow Temperature:** 260°C maximum for 10 seconds maximum • **Frequency Range:** 1kHz ~ 1MHz

Note (1): L_{BASE} = Nominal Inductance of a single winding. **Note (2):** I_{BASE} = is the lesser of $I_{SAT(BASE)}$ and $I_{RMS(BASE)}$ **Note (3):** Peak current that will result in 30% saturation of the core. This current value assumes that equal current flows in all six windings. Saturation current per winding may be calculated as follows: ISAT = 6 x $I_{SAT(BASE)}$/Number of windings driven. **Note (4):** IRMS current that results in a surface temperature of approximately 40°C above ambient. The 40°C rise occurs when the specified current flows through each of the six windings. **Note (5):** For multiple windings in series, the volt-µsec $_{TOTAL}$ (µVs) capability varies as the number of windings in series (S): Volt-µsec $_{TOTAL}$ = S x Volt-µsec$_{(BASE)}$. For multiple windings in parallel, the Volt-µsecond $_{TOTAL}$ (µVs) capability is as shown in the table above.

† These devices are designed for feed-forward applications, where load current dominates magnetizing current § Bulk

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Murata Power Solutions

Shielded Surface Mount Power Inductors

The 2900 and 4600 Series are bobbin-wound, shielded inductors suitable for power-line filtering found in consumer electronics such as desktop computers, LED applications and GPS systems, as well as a vast range of industrial and telecom applications including network hubs, bridges and routers, and high frequency wireless communication devices. The 4500 Series is a lower profile version of the 4600 Series.

Axial and Radial Lead Inductors

The **1100R Series** is a general purpose range of inductors suitable for low to medium current applications. Their small footprint makes them ideal for high density applications where a chip inductor will not cope with the power requirements.

The **1200LRS and 1200RS Series** of inductors is suitable for power line filtering in low to medium current applications such as switching power supply circuits. The integral ferrite shield makes these devices ideal for protecting circuits susceptible to EMI. The 1200LRS Series is for lower current. The 1200RS Series is for higher current.

The **1300R Series** is a general purpose range of inductors suitable for low to medium current applications such as power supply and other general purpose filtering designs.

The **1800 Series** inductors are particularly suited to use with a wide variety of switching regulators. Offering high current handling with a low mounting height, the devices are ideal where space is at a premium. The 1800R Series is a Radial Lead version of the 1800 Series, and features a small footprint.

The **2200R Series** is a general purpose range of inductors suitable for low to medium current applications. Their small footprint makes them ideal for high density applications where a chip inductor will not cope with the power requirement.

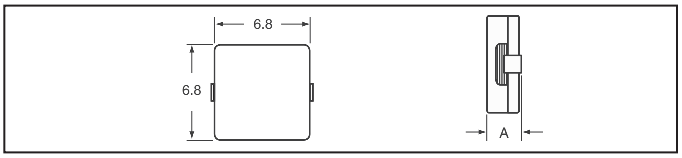
Flat Coil Surface Mount Power Inductors



The 3500 and 3600 Series is a range of flat-coil power inductors. They are ideal for high power designs which demand reliability in high temperature environments. Used to provide filtering or energy storage, they are suited to many power applications including portable devices, computers and telecom equipment.

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Murata Power Solutions

Bobbin Type Inductors

The 1400 Series is suitable for many power supply and other general purpose filtering applications. The use of a non-magnetic screw will ensure mechanical stability. The 2800 Series inductors are designed for use in switching power supply and power line filter circuits, and are suitable for any application requiring a high saturation current in a miniature surface-mount footprint.

Vertical Mount Toroidal Inductors

The 3200 and 3300 Series is a range of through hole power inductors. Due to the toroidal construction, they exhibit a very low EMI as stray flux is kept to a minimum. Typical applications include switching regulators and power line filtering.

Series	Dimensions (mm) A	B	C
3200	10.0	18.0	24.0

‡ Cut Tape

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

VISHAY Dale High Current Low Profile Surface Mount Inductors —
IHLP Series

Features: • Shielded construction • Frequency range up to 5.0MHz (1.0MHz for IHLP1616AB/BZ and IHLP2020BZ/CZ-11 series; 2.0MHz for IHLP6767GZ-01 series; 750KHz for IHLP6767GZ-11 series) • Lowest DCR/μH, in this package size • Handles high transient current spikes without saturation • Ultra low buzz noise, due to composite construction

Specifications: • All test data is referenced to 25°C ambient • **Operating Temperature Range:** -55°C ~ 125°C • **Inductance Tolerance:** ±20%

Applications: • PDA/Notebook/Desktop/Server applications • High current POL converters • Low profile, high current power supplies • Battery powered devices • DC/DC converters in distributed power systems • DC/DC converters for Field Programmable Gate Array (FPGA)

Applications for IHLP6767GZ-01 Series: • Desktop/server applications • High current buck and boost converters • Low profile, high current power supplies • DC/DC converters in distributed power systems • High current noise filter

† DC current (A) that will cause an approximate ΔT of 40°C ‡ DC current (A) that will cause Lo to drop approximately 20%

NOTE: The part temperature (ambient + temp rise) should not exceed 125°C under worst case operating conditions. Circuit design, component placement, PWB trace size and thickness, airflow and other cooling provisions all affect the part temperature. Part temperature should be verified in the end application.

† DC current (A) that will cause an approximate ΔT of 40°C ‡ DC current (A) that will cause Lo to drop approximately 20%

NOTE: The part temperature (ambient + temp rise) should not exceed 125°C under worst case operating conditions. Circuit design, component placement, PWB trace size and thickness, airflow and other cooling provisions all affect the part temperature. Part temperature should be verified in the end application.

VISHAY. Dale

High Current Surface Mount Inductors — IHSM Series

Features: • Flame retardant encapsulant (UL 94V-0) • Completely encapsulated winding provides superior environmental protection and moisture resistance • High current unit in surface mount package printed with model, inductance value and date code • Compatible with infrared or conventional reflow soldering methods • Pick and place compatible **Applications:** • Excellent for power line noise filters • Filters for switching regulated power supplies • DC/DC converters • SCR and Triac controls • RFI suppression **Electrical Specifications:** • Inductance: Measured at 1V with no DC current • Inductance Tolerance: ±15% • Incremental Current: The typical current at which the inductance will be decreased by 5% from its initial zero DC value • Operating Temperature: -55°C ~ 125°C (no load); -55°C ~ 85°C (at full rated current) **Material Specifications:** • Core: High resistivity ferrite core • Encapsulant: Epoxy • Terminals: 100% Sn over Ni

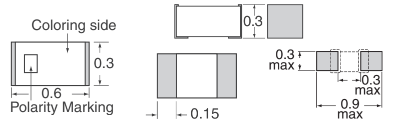
◊ For Tape and Reel part number, change 1-ND to 2-ND.

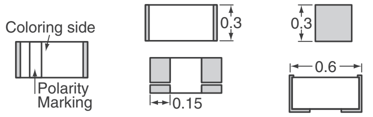
Dimensions in mm

LQP03T_00 Series



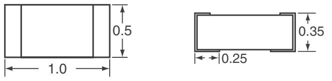
Murata's original thin film technology contributes further to miniaturizing high performance equipment because the size is small and the Q-value is high.

LQP03T_04 Series



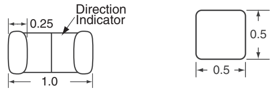
Features: • Ultra small 0201 size • High Q value of some items has been heightened and direction indicator has been enabled this enables easy impedance at matching RF and IF circuits • High frequency designing.

LQP15M Series



Features: • Tight inductance tolerance • Ultra small size 0402 inductor, low profile and lightest weight in the world, enables miniaturization of mobile telecommunication equipment • Weight: LQP15M Series 0.61mg/pcs multilayer film type inductor 0.94mg/pcs

LQG15HS Series



Chip inductors specifically designed for high frequency applications. They are designed to realize stable characteristics in high frequency range applying integrated multilayer process. Integrated multilayer process enables a wide range of inductance values with tight tolerance.

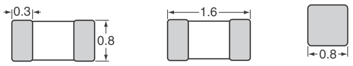
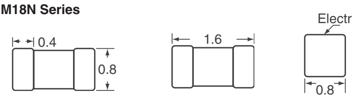
Dimensions in mm

LQM18F Series



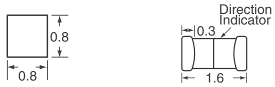
Special ferrite material, whose inductance change caused by bias current is small, enables large rated current of 50mA at 10 micro H. Magnetically shielded structure enables good crosstalk characteristics.

LQM18N Series



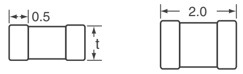
Magnetically shielded chip coils were developed by using original multilayer process technology and magnetic materials. Compact size is suitable for high density mounting. Shielded construction is not affected by interference from peripheral components.

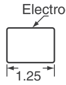
LQG18H Series



Designed to realize stable characteristics in high frequency range applying integrated multilayer process. Monolithic air core.

LQM21D Series

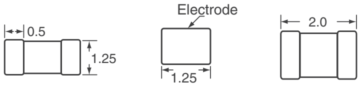




Part No.	t
LQM21DN4R7N00D LQM21DN100N00D	0.85 ± 0.2
LQM21DN220N00L	1.25 ± 0.2

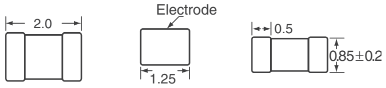
Consists of magnetically shielded chip inductors. It has less than half the DC resistance of our conventional monolithic chip inductors as well as high inductance. Monolithic design.

LQM21F Series



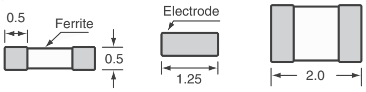
Suitable for power line choke because of its excellent direct current characteristics. The series has larger rated current (60mA at 10 micro H) than conventional rated current. Monolithic ferrite core.

LQM21N Series



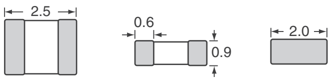
Consists of magnetically shielded chip inductors developed using Murata's original multilayer process technology and magnetic materials. The miniature size of 2.0mm x 1.25mm enables compact design of electric equipment.

LQM21P Series



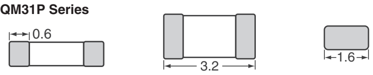
Features: • Small size in 2.0x1.25mm • Low profile • Large rated current of 1100mA • Magnetically shielded structure • Outstanding solder heat resistance, either flow or reflow soldering methods can be employed
Applications: • DC-DC converter circuits for mobile equipment

LQM2H Series



Features: • Small size of 2.5mm x 2.0mm • Flow/Reflow solderable • Low profile: 1.0mm max. • Large rated current: 1600mA, 1.0uH • Low DC resistance • Magnetically shielded structure
Applications: • DC-DC converters of mobile devices

LQM31P Series

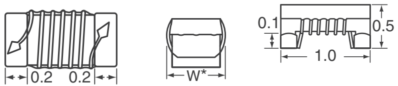


Features low DC resistance and magnetically shielded structure. Outstanding solder heat resistance. Either flow or reflow soldering methods can be employed.

Chip Coils Wound Type SMD

Dimensions in mm

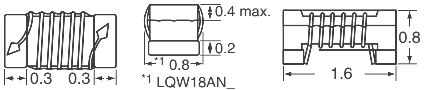
LQW15A Series



*W: 0.6±0.1 (1.5-22nH),
0.5±0.1 (27-56nH)

Consists of air core chip coil using a miniature alumina core. Has high Q value and high self resonant frequency in high frequency range. Suitable for high frequency circuits which are used in telecommunication equipment.

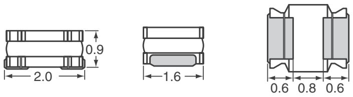
LQW18A Series



*1 LQW18AN_
10:0.8±0.3

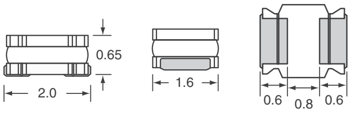
Horizontal winding structure enables tight inductance. High self resonant frequency realizes high-Q value and stable inductance at high frequency. Low DC resistance design is ideal for low loss, high output and low power consumption.

LQH2MC_02 Series



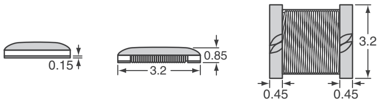
Wire wound type with low profile (0.95mm) and wide inductance range.

LQH2MC_52 Series



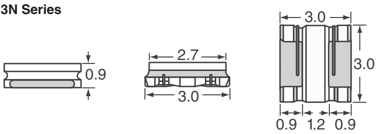
Features: • Wire wound type with 0.70mm maximum ultra low-profile • Rated current: 595mA (1.0μH) • Inductance range: 1.0μH ~ 10μH
Applications: • DC-DC converter

LQY33P Series



Small size with large rated current (2.2μH). Small inductance change plus bias current enables high performance for DC-DC converter. Magnetically shielded structure. Low profile.

LQH3N Series



Features: • Small size of 3.0mm x 3.0mm • Low profile: 1.0mm max. • Reflow solderable • Large rated current: 1525mA, 1.0μH • Low DC resistance • Magnetically shielded structure
Applications: • DC-DC converters of mobile devices

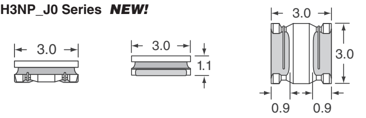
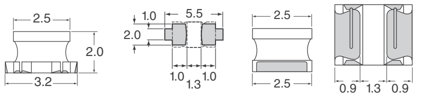
Dimensions in mm Digi-Reel® RoHS

LQH3NP_J0 Series *NEW!*



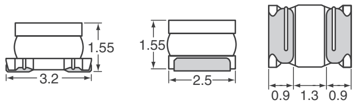
Features: • Large Rated Current: Based on Inductance Change: 1400mA at 1.0µH; Based on Temperature Rise: 2050mA at 1.0µH • Inductance Range: 1.0µH ~ 100µH • Magnetically shielded structure • Lead-free reflow soldering available
Applications: • DC-DC converter

LQH32C_23 Series



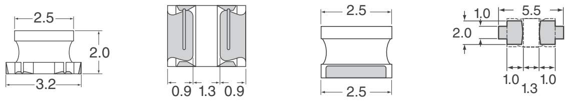
Consists of miniature chip coils with low DC resistance, high current capacity, and high impedance characteristics. Features are possible by the development of Murata's automatic winding techniques. Excellent for use as power supply line choke coils.

LQH32C_53 Series



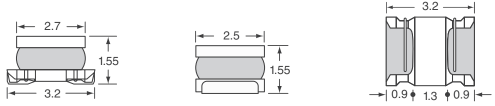
Consists of miniature chip coils with low DC resistance, high current capacity and high impedance characteristics. Excellent for use as choke coils in DC power supply circuits. High rated current and low profile with a maximum height of 1.7mm

LQH32M Series



Consists of miniature chip inductors wound on a special ferrite core. High Q value at high frequency and low DC resistance.

LQH32P_N0 Series *NEW!*



Features: • Large allowable DC current of 2550mA (0.47µH) • Inductance Range: 0.47µH ~ 22µH • Magnetically shielded structure • Lead-free reflow soldering available
Applications: • DSC, DVC and 3.5/2.5" HDD • DC-DC converter for communication module of WiMAX

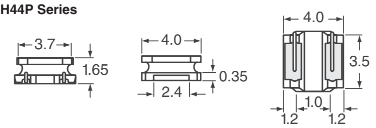
Digi-Reel® **Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.**

Chip Coils Wound Type SMD *(Cont.)*

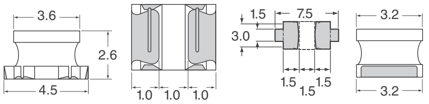
Dimensions in mm

LQH44P Series



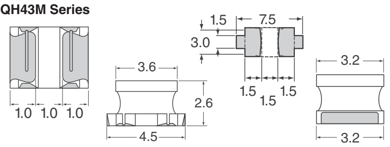
Large DC current rating of up to 2.95A. Offers both low DC resistance between 0.03~0.37Ω and low power loss. Wide operating temperature range of -40°C~85°C. Available for extended requirements. Wide inductance range from 1.2µH~22µH. Magnetically shielded structure. Reflowable.

LQH43C Series



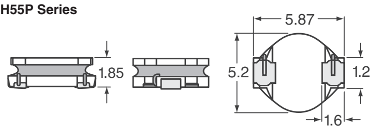
Consists of miniature chip inductors with low DC resistance, high current capacity, and high impedance characteristics. It is suitable for use as choke coil in DC power supply circuits.

LQH43M Series



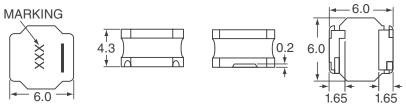
Consists of winding type chip coils for general use by Murata's original auto winding technology and ferrite core. High Q value at high frequency and low DC resistance.

LQH55P Series



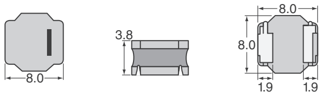
Large allowable DC current of 2600mA (at 1.2 µH). The series has an inductance range from 1.2µH~22µH. Magnetically shielded structure. Reflow soldering methods can be employed.

LQH6PP Series *NEW!*



Large rated current of 4.30A (at 1.0µH). The series has an inductance range from 1.0µH ~ 100µH. Magnetically shielded structure. Reflow soldering methods can be employed. **Applications:** • DC-DC Converter

LQH88P Series *NEW!*



Large rated current of 8.00A (at 1.0µH). The series has an inductance range from 1.0µH ~ 100µH. Magnetically shielded structure. Reflow soldering methods can be employed. **Applications:** • DC-DC Converter

† Test Frequency at 250MHz   § Test Frequency at 200MHz   ▲ Test Frequency at 150MHz   ‡ Test Frequency at 100MHz   ★ Test Frequency at 796kHz
◊ For Tape and Reel part number, change 1-ND to 2-ND.

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Common Mode Choke Coils Wound Type, Film Type and Film Type Arrays

DLW21H Series: Excellent noise suppression for limited board space applications. Suitable for differential signal line like USB2.0, IEEE1394 and LVDS. DLW21H does not provide distortion to high speed signal transmission due to its high coupling. (USB2.0:DLW21HN900SQ2).

DLW21S Series: Able to suppress noise for high-speed differential signal lines which are used in digital AV interfaces, such as HDMI and DVI, without damage to the signal wave.

DLW31S Series: High common mode impedance at high frequency provides excellent noise suppression performance. DLW31S series enables noise suppression for differential signal line without distortion in high speed signal transmission due to its high coupling. Small dimension enables higher density mounting.

DLW5BS Series: High performance wound type chip common mode choke coil. Its high impedance characteristic enables great noise suppression, but it does not damage high speed signal due to low normal mode impedance.

DLW5BT Series: Suitable for noise suppression at DC power line and portable equipment. Low profile. Small size and high rated current. High common mode impedance.

DLP0NS Series: Enables noise suppression for differential signal line without distorion in high-speed signal transmission due to its line impedance matching. *Applications:* Common mode noise suppression of high speed differential signal lines for USB 2.0, IEEE1394, LVDS

DLP11S Series: Enables noise suppression for differential signal line without distortion in high-speed signal transmission due to its high coupling. DLP11SN_HL2 series match with line impedance. High cutoff frequency is suitable for high speed differential signal line such as HDMI.

DLP31S Series: Has excellent performance at high frequency range. Suitable for differential signal line like USB, because DLP31S does not provide distortion to high speed signal transmission due to its high coupling (coupling coefficient: 0.98 minimum).

DLP2AD Series: High common mode impedance characteristics. DLP2AD can suppress common mode noise without damage to signal wave. DLP2AD match with line impedance.

DLP31D Series: Utilizing ferrite materials and thin film technology, this common mode choke coil array has high impedance characteristics all packaged in a small case size. 2 components are included in 3.2 x 1.6mm. DLP31D can suppress common mode noise without damage to signal wave.

Panasonic® Surface Mount Inductors

Non-Winding and Wire Wound Type chip inductors for automatic and high-density mounting.

Features:

- High Q • Good for mounting • Wide availability range (1.0nH ~ 1000μH)
- Stable L-value in any mounting direction (Non-Winding Type)

Recommended Applications:

- Portable telephones, Wireless Communication equipment (W-LAN, BT), PDA, Camcorder, DSC, Various modules, HIC, TV, VTR, PC peripherals

	Non-Winding Type		Wire Wound Type

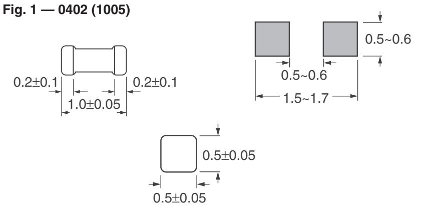
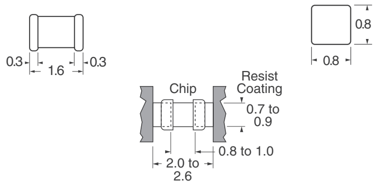
Fig. 1 — 0402 (1005)



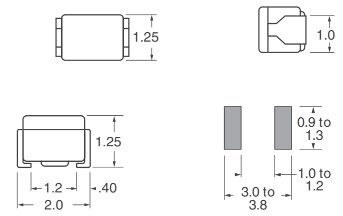
RF Type (Non-Winding Type): • High Q • High self-resonant frequency • Non-Polarity
PF Type: • High power type • Stable for power line as choke coil
QF Type: • High Q • Lead-Fre

Fig. 2 — 0603 (1608)



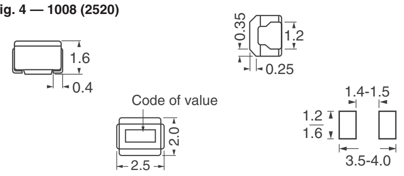
RE Type (Non-Winding Type): • Small size • High self-resonant frequency • Tight tolerance
PE Type (Non-Winding Type): • Small size • High self-resonant frequency

Fig. 3 — 0805 (2012)



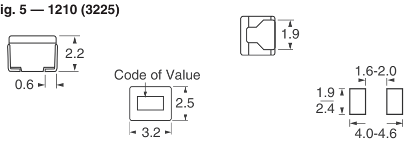
ND Type: • High Q • High self-resonant frequency

Fig. 4 — 1008 (2520)



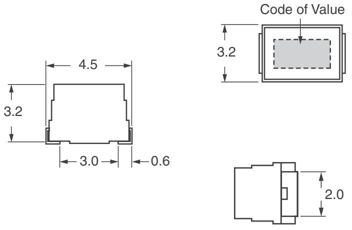
NC Type: • Low inductance, tight tolerance and small size • Suitable for high-frequency circuits • Coreless type • L is stable with respect to temperature and humidity
FC and SC Type: • Smallest of the coil type inductors • Suitable for a variety of small processing circuits • SC Type is equipped with a magnetic shield function
PC Type: • High rated DC current • Low DC resistance • Suitable for power circuits

Fig. 5 — 1210 (3225)



EA Type: • Low DC resistance
FA/DA Type: • Chip inductor for general use • Compact size with a wide inductance range • FA(D) Type Low Distortion • DA Type Super Low Distortion
NA Type: • Coreless Type • L is stable with respect to temperature and humidity suitable for high-frequency circuits
PA Type: • High power • High rated DC current • Suitable for power line as choke coil • PA(2) Type has lower DC Resistance
SA Type: • Use of ferrite resin giving it an additional function of magnetic shield • Compact size with high inductance

Fig. 6 — 1812 (4532)



FB and PB Type: • Chip inductor for general use • High inductance

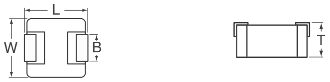
Power Choke Coils



Specifications: • Operating Temperature: -55°C ~ 125°C

Features: • High Power • High Saturation Current • Inductance Tolerance: 20%

Applications: • DC/DC Converter for CPUs • Thin-type on-board Power Supply Module for the Exchanger

SUSUMU Thin Film Chip LC Filter

Dimensions in mm

Electrical Specifications:

TBF-1608-245-R1N: • **Application:** Bluetooth, W-LAN • **F0:** 2450MHz • **Band:** 2400 ~ 2500MHz • **Insertion Loss:** 1.7dB @25°C, 1.9dB @ -40°C ~ 85°C • **Attenuation:** 20.0dB @1710 ~ 1910MHz, 30.0dB @4800 ~ 5000MHz, 30.0dB @ 7200 ~ 7500MHz • **VSWR in BW:** 2.0 max. • **Impedance:** 50Ω • **Power:** 500mW Max.

TBF-2012-245-R1: • **Application:** Bluetooth, W-LAN • **F0:** 2450MHz • **Band:** 2400 ~ 2500MHz • **Insertion Loss:** 1.5dB @25°C; 1.6dB @ -40°C ~ 85°C • **Attenuation:** 30.0dB @880 ~ 960MHz, 25.0dB @1710 ~ 1910MHz, 30.0dB @ 4800 ~ 5000MHz, 30.0dB @ 7200 ~ 7500MHz • **VSWR in BW:** 2.0 max. • **Impedance:** 50Ω • **Power:** 500mW Max.

TBL-1608-245-M2: • **Application:** Bluetooth, W-LAN • **F0:** 2450MHz • **Band:** 2400 ~ 2500MHz • **Unbalance Port Impedance:** 50Ω • **Balance Port Impedance:** 100Ω • **Phase:** 180 ±10° • **Insertion Loss:** 1.0dB max. @25°C • **VSWR in BW:** 2.0 max. • **Power:** 500mW max.

Thin Film Inductors

Features:
- Excellent inductance tolerances
- Thin package profiles
- Self resonant frequencies of more than 1GHz
- High Q values
- High rated currents

SSMH1005-KIT-ND HPL1005 Series 0402 SMD Thin Film Inductor Kit, 40 each of 28 values (1.0nH ~ 15nH)........ **$81.82**

Panasonic® Voltage Step-Up Coil

ELT-3KN, ELT-5KN and ELT-5KT Types

High inductance Voltage Step-up coil chip series for piezo-electric buzzer and DC-DC circuit of EL

Features: • Small and thin • High inductance

Recommended Applications: • Watches, Toys, Camera, Electronic thermometers, Pagers, PHS, Portable telephones

Operating Temperature: -20°C ~ 85°C (-20°C ~ 105°C for the 5KT Type).

◆ RoHS Compliant *✔ NEW!*

SMD Choke Coils

ELC-3FN and ELC-3GN Types

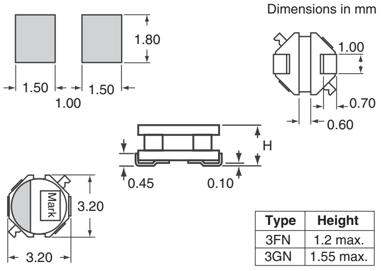
Features: • Low DC resistance and large current capability • Shock resistant

Recommended Applications: • DC/DC converter circuitry for computer peripherals and cellular hand sets • Chopper circuit decoupling chokes in DC/DC converter circuitry

Rated Current: This indicates the value of current when the inductance is 70% of nominal value and case temperature has risen Δt=45°C (at 20°C)

Operating Temperature: -40°C ~ 105°C (Including self-temperature rise)

Dimensions in mm



Type	Height
3FN	1.2 max.
3GN	1.55 max.

SMD Choke Coils *(Cont.)*

ELL-4FG-A, ELL-4LG-A, and ELL-4GG Types

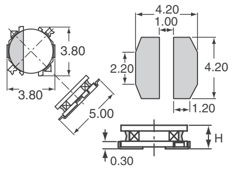
Features:

- Magnetically shielded structure
- Low DC resistance and large current capability
- Shock resistant

Recommended Applications:

- DC-DC converter circuitry for computer peripherals and cellular phones
- Chopper circuit decoupling chokes for DC-DC converter circuitry

Fig. 1 Dimensions in mm



Type	Height
ELL4FG-A	1.20 max.
ELL4LG-A	1.80 max.

ELL6RH, ELL6SH and ELL6UH Types

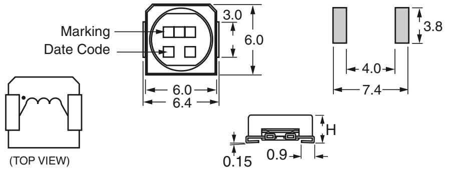
Magnetic Shielded Series

Features: • Thin type (ELL6RH – 2.5mm height, ELL6SH – 3.0mm height, ELL6UH – 4.7mm height) • Higher reliability in mounting by separated user terminal and internal connection • High current **Recommended Applications:** • Video, audio, mobile communications, electric battery driving equipment • Choke coils for chopper circuit, and decoupling choke in DC/DC convertor circuit **Cautions for Use:** • DC/DC convertor — Chopper type: 1W maximum • Operating Temperature: 105°C maximum (including self-temperature rise)

Rated Current: ELL6RH and **ELL6SH**: This indicates the value of current when the inductance is 80% more than nominal value and temperature rising Δt=45°C lower at D.C. superposition (at 20°C)

ELL6UH: This indicates the value of current when the inductance is 70% more than nominal value and temperature rising Δt=45°C lower at D.C. superposition. (20°C)

Dimensions in mm



Type	Height
ELL6RH	2.5 ±0.3mm
ELL6SH	3.0 ±0.3mm
ELL6UH	4.7 ±0.3mm

ELL-6GG and ELL-6PG Types

Features:

- Magnetically shielded structure
- Low DC resistance and large current capabilities

Recommended Applications:

- DC-DC converter circuitry for computer peripherals and cellular phones
- Chopper circuit decoupling chokes for DC-DC converter circuitry

Dimensions in mm

ELL6PV Type

Features: • Thin type (height, 1.8mm) • Capable of corresponding high current • Low DC resistance

Recommended Application: • Videos, audio, mobile communications, electric battery driving equipment • Choke coils for chopper circuit decoupling choke in DC/DC convertor circuit

Cautions for Use: • DC/DC power converter • Chopper type: 1W maximum • Operating temperature: 105°C maximum (Including self-temperature rise)

Note:
† Rated Current: This indicates the value of current when the inductance is 70% more than nominal value and temperature rising Δ t=45°C lower at D.C. superposition. (at 20°C)

4GM	1.5 Max.

Series ELL4LM
Features: • Magnetic shielded structure • Low DC resistance, high current • Structure for withstanding fall shock • Available on tape and reel for automatic insertion
Recommended Applications: • DC/DC Converter Circuit for Computer peripheral, hand phone • Choke coils for chopper circuit decoupling choke in DC/DC Converter Circuit

Series ELL4GM
Features: • Low Profile • High Power • High Inductance • Shock Resistant **Recommended Applications:** • Digital Base Band

Operating Temperature: -40°C ~ 105°C (Including self-temperature rise)

Note:
† Rated Current: This indicates the value of current when the inductance is 70% of nominal value or when case temperature has risen 45°C (at 20°C).

Recommended Applications:
- DC/DC converter circuitry for computer peripherals and cellular hand sets • Chopper circuit decoupling chokes in DC/DC converter circuitry

Operating Temperature: -40°C ~ 105°C (Including self-temperature rise)

Note: **† Rated Current:** This indicates the value of current when the inductance is 70%of nominal value or when the case temperature has risen 45°C (@20°C)

SMD Power Choke Coils

ETQP4L Type

Features: • Small size, space-saving (11.5mm x 10mm x 4 mm) • Capable of corresponding high current (15 ~ 21A) • Low loss (DCR: 0.7 ~ 1.6mΩ) • Capable of corresponding high frequency (to 1MHz) • Surface mount and lead-free type

Recommended Applications: • DC/DC converter for driving CPU at high speed such as server and router • Electric power supply for CPU peripherals of Notebook PC and Desktop PC

Dimensions in mm

ETQP5L Type

Features: • Small size, space-saving (11.5mm x 10mm x 4mm) • Capable of corresponding high current (21 ~ 28A) • Low loss (DCR: 0.7 ~ 1.6mΩ) • Capable of corresponding high frequency (to 1MHz) • Low buzz noise due to gap-less structure

Recommended Applications: • DC/DC converter for driving CPU at high speed such as server and router • Desktop PC power supply modules

ETQP5M Type

Features:
- High heat resistance • Excellent DC bias characteristics • Low buzz noise • High reliability at high temperatures • High efficiency

Recommended Applications:
- Noise filter for various drive circuitry requiring high temperature operation and large peak current handling capability • DC/DC converter

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Panasonic® SMD Power Choke Coils

PCC-N6 Type — Thin, Compact and High Power

Features:

- High power type • Thin type (5.7mm height) • Low leakage flux

Recommended Applications:

- DC/DC converter for driving PC at high speed • Thin type on-board power supply module for exchanger (10 ~ 40W)

Pulse® A TECHNITROL COMPANY

Wire-Wound RF Chip Inductors 0402, 0603, 0805

Digi-Reel® RoHS COMPLIANT

Specifications:

Wire-wound ceramic core construction

- **Operating Temperature:** -40°C ~ 125°C
- **Terminal Plating:** Gold (0402), Tin or Gold manufacturers' discretion (0603, 0805)

Note:

Inductance information is not stamped on part because of the small size.

† Inductance measured using a HP4286A RF Impedance Analyzer. ‡ Based on a 15°C maximum temperature rise. § Q measured using a HP4291A RF Impedance Analyzer with a HP16193A Test Fixture. ▲ SRF measured using a HP8753C Network Analyzer. ◊ R_{DC} measured using a Valhalla Scientific model 4100 ATC Digital Ohmmeter.

Digi-Reel® Most SMT cutdown parts are available on a **Digi-Reel**®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See **Digi-Key**® Services on page 2 for additional information.

SMT Power Inductors Unshielded Drum Core P0751/2 Series

Specifications:

- **Operating Temperature:** -40°C ~ 130°C
- **Footprint:** 13.0mm X 9.4mm maximum
- **Current Rating:** Up to 6.8A
- **Inductance Range:** 1.0µH ~ 1000µH

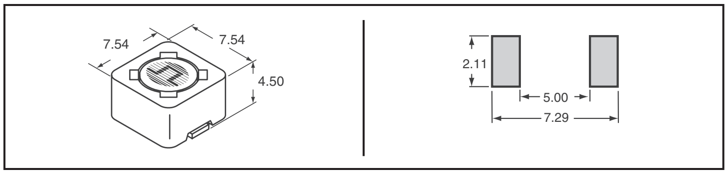
Notes: The temperature of the component (ambient plus temperature rise) must be within the specified operating temperature range.

1. Inductance tested at 100kHz, 10 mVRMS.
2. Inductance drop = 10% typical at the Saturation Current.
3. ΔT = 15°C rise typical at the Heating Current.
4. The rated current is the lower of the saturation or heating current.

* For Tape and Reel part number, change 1-ND to 2-ND.

SMT Power Inductor Shielded Drum Core P1167 Series



Specifications:

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Power Toroid Inductors - for National Simple Switcher™

Specifications: • Base Material meets flammability requirements of UL94V-0 • Operating Temperature: -40°C ~ 130°C

150kHz Inductors are tested and recommended by National Semiconductor for the LM259X series regulators.

260kHz Inductors are tested and recommended by National Semiconductor for the LM267X series regulators.

† Dimension "C" is .400" (10.16mm) for the marked models because of heavier wire gauge.

Note: Electrical Specification tested at 25°C. Reference values are for an inductor with a 55°C temperature rise.

Telecommunication Transformers T1/E1 and T3/E3

Transformers designed for digital and analog telecom applications supporting a wide variety of leading transceiver IC manufacturers.

Specifications: • **Standard Operating Temperature:** 0°C ~ 70°C • **Extended Temperature:** -40°C ~ 85°C • **Agency Approvals:** UL1459 / UL1950, EN60950 per BABT • **Isolation Voltage:** 1500Vrms

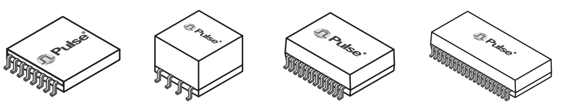
Pulse®
A TECHNITROL COMPANY

LAN Discrete Modules



Pulse offers the most comprehensive line of discrete LAN magnetics modules available to the OEM worldwide. With technological advancements such as patented InterLock Base construction. Modules for 10/100/1000BASE-TX (Gigabit), 10/100BASE-TX, 10BASE-T, and ATM applications are optimized for all major LAN transceivers. All modules provide electrical circuit isolation that meets applicable IEEE and ANSI standards, while maintaining signal integrity needed for the most demanding applications. 10BASE-T modules have various levels of filtering for use with each referenced IC. 10/100BASE-TX and Gigabit modules provide "tuned" common mode noise attenuation best matched to the transceiver being considered.

Operating Temperature: 0°C ~ 70°C (unless otherwise noted)

EPCOS

Helically Wound Power Inductors

Features: • Very high rated current • Extremely low DC resistance • Very low profile and smallest possible footprint • Suitable for pick-and-place processes **Construction:** • Ferrite core • Magnetically shielded • Winding: Enamel copper flat wire • Self-leaded construction under body termination **General Technical Data:** • Operating Temperature: -40°C ~ 130°C

Surface Mount Inductors

Features:
B82422A Series: • Very wide temperature range (up to 145°C) • High Q factor • High resonance frequency **B82422H Series:** • Very high current handling capability • Suitable for reflow soldering • Qualified to AEC-Q200 **B82422T Series:** • High Q factor • High resonance frequency • High inductance value **B82432C/T Series:** • High current handling capability • Suitable for reflow (IR and vapor phase) and wave soldering **B82442A Series:** • High current handling capability • High inductance rating • Suitable for reflow (IR and vapor phase) and wave soldering **B82442H Series:** • Very high current handling capability • High inductance value • Suitable for reflow (IR and vapor phase) and wave soldering **B82496C Series:** • High resonance frequency • Free of polarization effect • Close inductance tolerance • High mechanical stability **B82498F Series:** • High resonance frequency • Suitable for reflow (IR and vapor phase) and wave soldering **B82462A4/G2/G4 Series:** • Wide temperature range • High rated current • Low DC resistance **B82464A/G/Z Series:** • Wide temperature range • Very high rated current • Low DC resistance • Suitable for reflow soldering **B82470A Series:** • Low profile • High rated current • Low DC resistance **B82476A Series:** • Very high rated current • Low DC resistance • Suitable for reflow soldering **B82477G2/G4 Series:** • Wide temperature range • Very high rated current • Low DC resistance **B82479A1 Series:** • Very high rated current • Low DC resistance • Suitable for reflow soldering

Chokes for Data and Signal Lines

B82790S0513N201:

Features: • Current compensated ring core choke with ferrite core • Case flame-retardant per UL94V-0 • Suitable for reflow soldering **Specifications:** • Rated voltage: 42VAC (50/60Hz) / 80VDC

B82793S0513N201:

Features: • Current compensated ring core choke with ferrite core • High rated current • Reduced component height • Case flame-retardant per UL94V-0 • Suitable for reflow soldering **Specifications:** • Rated voltage: 42VAC (50/60Hz) / 80VDC

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Chokes for Power Lines — Current Compensated Ring Core Double Chokes

Construction: • Current-compensated ring core double choke with ferrite core • Polycarbonate case • Polyurethane potting • Sector winding
Features: • Case and potting flame-retardant per UL94V-0 • High resonance frequency owing to a special winding technique • Approximately 1% stray inductance for symmetrical interference suppression
Specifications: • Rated voltage: 250VAC • Test voltage: 1500VAC for 2 seconds (line/line) • Inductance tolerance: ±30%

D Core Chokes

Construction:
• Current-compensated double choke with closed, rectangular ferrite core • Closed polycarbonate coil former with 4 sections • Without encapsulation • 2-section winding

Features:
• Coil former is flame-retardant per UL94V-0 • High resonance frequency due to 2-section winding • Low leakage due to closed core shape • High pulse strength • Approximately 1% stray inductance for symmetrical interference suppression

Specifications:
• Rated voltage: 250VAC/DC • Test voltage: 1500VAC for 2 seconds (line/line) • Inductance tolerance: -30/+50%

FC Core Chokes

Construction: • Current-compensated double choke • Closed magnetic circuit with frame construction • 4-section winding with direct winding of the core
Features: • High inductance with low resistance • Excellent differential-mode suppression • Low height allows usage in lamp ballasts • High pulse-handling capability
Specifications: • Rated voltage: 250VAC • Test voltage: 1500VAC for 2 seconds (line/line) • Inductance tolerance: ±30%

E

Magnetics Modules for LAN Applications

Features: • Specifically for LAN applications, EPCOS has developed magnetic modules for both electrical isolation and suppression of common-mode and differential-mode interference. • The modules are available in single, dual and quad port versions and are qualified to IPC/JEDEC J-STD-020C abd IEEE 802.3. • The electrial isolation can withstand a breakdown voltage of 1500 VAC.

Characteristics: • The insertion loss of the modules is only -1.0 dB. • Values of -16 dB and -40 dB are attained for return loss and crosstalk, respectively. • In addition to the standard temperature range for 0°C ~ 70°C, versions with an extended temperature range -40°C ~ 85°C were developed for industrial applications. • Typical applications are 10/100 Base-T, 1000 Base-T as well as PoE (Power over Ethernet).

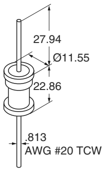
Series 4590 High Current Filter Inductors



Mechanical Configuration: Ferrite bobbin protected with a flame retardant polyolefin sleeve. High saturation bobbin allows for high inductance with low DCR. High resistivity core offers very high parallel resistance, resulting in maximum coil performance. **Operating Temperature:** -55° ~ 125°C (-55° ~ 85°C @ full rated current) **Maximum Power Dissipation @ 85°C:** .70W **Dielectric Withstanding Voltage:** 2500VRMS

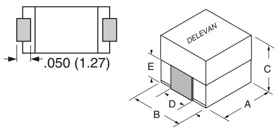
Series 4922 High Current Surface Mount Power Inductors



Mechanical Configuration: Units are encapsulated in a surface mount package using an epoxy molded case. Leads are pre-tinned. A high resistivity ferrite core allows for high inductance with low DC resistance.
• **Operating Temperature Range:** -55°C ~ 125°C • **Current Rating:** 40°C Rise over 85°C Ambient • **Maximum Power Dissipation @ 85°C:** .55W • **Inductance:** Measured at 1V with no DC current

Series 8532 Surface Mount Power Inductors

Mechanical Configuration: Units are encapsulated in a surface mount package using an epoxy molded case. High resistivity ferrite core allows for high inductance with low DC resistance. **Operating Temperature Range:** -55°C ~ 125°C **Current Rating:** 40°C Rise over 85°C Ambient **Maximum Power Dissipation at 85°C**: .50W **Inductance:** Measured at 1V with no DC current

Series SPD62 Shielded Surface Mount Inductors

This low cost power choke is suitable for PDA, palmtop and other power management applications requiring small size, high current capacity and a shielded winding to reduce EMI/RFI. The flat top construction lends itself to auto-insertion. **Operating Temperature Range:** -55°C ~ 125°C

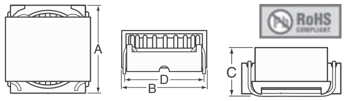
◆ ***RoHS Compliant***

Series HCT High Current Toroidal Inductors



Features:
- Surface mount
- Low profile, self-leaded

Specifications:
- Frequency Range: 1KHz ~ 1MHz
- Operating Temperature Range: -30°C ~ 130°C
- Materials: Meets UL94V-0
- Maximum Power Dissipation @ 25°C: HCTR-37x: 0.9W; HCTR-44x: 1.0W; HCTR-50x: 1.1W; HCTR-68x: 1.2W
- Test Frequency: 100KHz

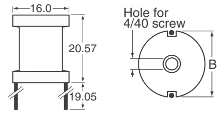
Series DC630 High Current Power Line Chokes



Features: • Insulated ferrite bobbin protected with a flame retardant polyolefin sleeve • Center hole allows for mechanical mounting
Specifications: • Operating Temperature: -55°C ~ 125°C (-55°C ~ 80°C @ full rated current) • Power Dissipation at 80°C: 1.0W

Series 4426 Surface Mount Air Core Inductors

High Q, wire wound air cores designed to operate over a wide frequency range. Flat cap top is suitable for automatic placement.
Operating Temperature Range: -55°C ~ 125°C

◊ For Tape and Reel part number, change CT-ND to TR-ND.

Series BF Split Ferrite Suppressors for Round Cables

One of the most versatile and cost effective shielding methods that can be used today is the API Delevan bisected ferrite cable snap assembly. The bisected styling, or familiar clamshell enclosure design, offers the ultimate in adaptability. The RF absorbing material interacts directly with unwanted high frequency energy and dissipates it effectively while allowing data signals to pass unimpeded.

All plastic and adhesive components are UL Recognized with Flammability Ratings of UL94V-0, UL-510 or UL-746C. Color is black.

Flexible Ferrite Absorbent Tubing

Features: • Provides effective EMI suppression in a wide frequency range (10MHz to 3GHz) • High electrical resistance (10^6 to 10^8) • Easy and fast to process • Extremely flexible • Six sizes to chose from • Can be incorporated into the over-molding process on cable assemblies • Eliminates the task of soldering braid • Effectively eliminates EMI and RFI problems on internal and external power, data and signal lines
Specifications: • Operating Temperature Range: -55°C ~ 125°C • Length: 1 meter

Flexible Ferrite Absorbent Material

Features: • Provides effective EMI suppression in a wide frequency range (10MHz to 3GHz) • Effective in preventing resonance and suppressing coupling • Ultra thin (.25mm through 2.5mm) • High electrical resistance (10^6 to 10^8 ohms) • Extremely flexible
Specifications: • Operating Temperature Range: -55°C ~ 125°C

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Midcom WÜRTH ELEKTRONIK

WE-TPC Series — Shielded Low Profile Power Inductors

Digi-Reel® RoHS COMPLIANT

Features: • Extremely low height power inductor • High current capability • High reliability and perfect soldering characteristics because of an integrated soldering pad • Magnetically shielded which results in a low leakage field • Recommended solder profile: Reflow

Applications:
• Portable power devices like PDA, digital camera, PCMCIA cards and data displays • DC/DC converter • Embedded PC • Clocked power supply • Mobile data gathering, telemetric

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Midcom WÜRTH ELEKTRONIK

WE-HCA Series — High Current Flat Wire SMD Inductors

Features: • Flat wire coil for low loss at high frequency • Low stray field • Extremely low profile design • Extremely low core loss allows design optimization for high ripple currents • Current capability up to 65A • Operating temperature: -40°C ~ 155°C • Recommended solder profile: Reflow • Inductance Tolerance: ±20% **Applications:** • Graphic cards • Laptops • Industrial computers • Motherboards • High current switching regulators • High temperature electronics • Polyphase switching regulators

WE-HC Series — High Current Flat Wire SMD Inductors

Features: • Flat wire coil for low loss at high frequency • Low stray field • Extremely low profile design • Extremely low core loss allows design optimization for high ripple currents • Current capability up to 40A • Operating temperature: -40°C ~ 155°C • Recommended solder profile: Reflow • Inductance Tolerance: ±20% **Applications:** • Graphic cards • Laptops • Industrial computers • Motherboards • High current switching regulators • High temperature electronics • Polyphase - switching regulators

NEW! Trilogy of Magnetics — 4th Edition The Design Guide

The design guide for EMI Filter Design and SMPS and RF Design Circuit is completely revised, newly structured, and covers a multitude of new components and applications. The design guide is divided into the following chapters: Basic Principles, Components, and Applications. A keyword index, as well as a formulary, complete the book. The objective of the design guide, "Trilogy of Magnetics", is to practically familiarize customers and users with the characteristics and applications of inductive components. The design guide was published 8 years ago for the first time and is now a standard work for lots of development departments and universities. In the 4th edition, the explanation of old techniques and components has been set aside to have more room for new components and applications. Notably, a multitude of external authors from our customer base and our well known manufactures passed on their experiences and solutions in the Basic Principles and Applications section.

732-2511-ND (744006) **$72.00**

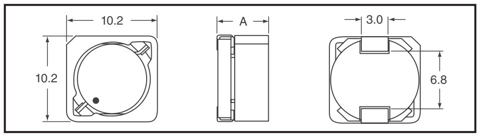
Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Midcom WÜRTH ELEKTRONIK

NEW! WE-PDF Series — Shielded Power Inductors

Digi-Reel® RoHS COMPLIANT

Dimensions in mm



Features:

• Flat power inductor • High storage capability • Magnetically shielded which results in a low leakage field • Low self-losses • High saturation current • Flat wire coil for lower losses at high frequency ranges • High self resonance frequency • Operating temperature: -40°C ~ 150°C • Recommended solder profile: Reflow

Applications:

• Switching regulators with high switching frequencies • Optimized design with lower copper losses

732-2229-ND (744332) ***NEW!*** WE-HCC Series Kit (See Digi-Key website for contents of kit) **$135.00**

NEW! WE-HCB Series — High Current Power Inductors

Digi-Reel® RoHS COMPLIANT

Features: • Flat wire inductor • Very low DCR tolerance of ±8% • Magnetically shielded version • Operating temperature: -40°C ~ 125°C

Applications: • DC/DC converter • Filter

Dimensions in mm

Midcom WÜRTH ELEKTRONIK

WE-PD Series — Shielded Power SMD Inductors

Features: • Magnetically shielded version which results in a low leakage field • High storage capacity • Low self-losses • Highest possible current loading for SMD inductors • Operating temperature: -40°C ~ 125°C • Recommended solder profile: Reflow

Applications:
• Switching regulators with low operating voltages (computer, laptop, mobile phones, pagers) • Integrated DC/DC converter • Perfectly suitable for switching regulators with extremely high efficiency (>86%) • Graphics cards

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

WE-PD2 Series — SMD Power Inductors

Feature: • Industry standard sizes • Operating temperature: -40°C ~ 125°C • Recommended solder profile: Reflow • Current capability up to 14A **Applications:** • Switching regulators with low operating voltage (computer, laptop, mobile phones and pagers) • Integrated DC/DC converter • Perfectly suitable for switching regulators with extremely high efficiency (>86%)

WE-PD3 Series — Shielded SMD Power Inductors

Features:

• Magnetically shielded version which results in a low leakage field • Extremely low profile • Low inherent losses • High storage capacity • Operating temperature: -40°C ~ 125°C • Recommended solder profile: Reflow

Applications:

• EMI filter • Perfectly suitable for switching regulators with extremely high efficiency

NEW! WE-DD Series — SMD Shielded Coupled Inductors

Dimensions in mm

Features:
- 1:1 Transformer
- Double inductor with two identical windings
- Operating temperature: -40°C ~ 125°C

Applications:
- SEPIC and CUK switching regulators
- Flyback applications
- Switching regulators with second, unregulated output voltage

† For Tape and Reel part number, change 1-ND to 2-ND.

WE-PD4 Series — SMD Power Inductors

Features: • Compact Size • Current loading up to 35A • Industry standard size • Low-loss ferrite core • High storage capacity • Operating temperature: -40°C ~ 125°C • Application frequency range up to 10MHz • Recommended solder profile: Reflow

Applications: • Noise suppression • Perfectly suitable for switching regulators with extremely high efficiency

Dimensions in mm

732-1645-ND (744720) WE-PD/PD2/PD3/PD4 Series Kit (See Digi-Key website for contents of kit)… **$120.00**

Midcom WÜRTH ELEKTRONIK

WE-KI Series — Wire Wound Ceramic Inductors

Digi-Reel® RoHS COMPLIANT

Features:

- High thermal stability
- Operating Temperature: -40°C ~ 125°C
- Offers excellent Q factor and highest possible self resonant frequencies up to 12.7GHz

Applications:

- Developed for high frequency applications
- Telecommunications
- Bluetooth
- Wireless LAN

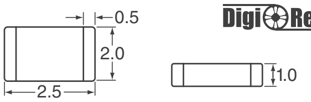
NEW! WE-PMI Series SMD-Power Multilayer Inductors



Features:
- Ferrite Core • Operating Temperature: -40°C ~ 125°C • Compact multilayer type • No crosstalk

Applications:
- DC/DC converters especially at high switching frequencies • Portable devices like PDA and digital cameras

0603	1.6	0.81	0.61

The Accu-L® SMD Inductor is based on thin-film multilayer technology. This technology provides a level of control on the electrical and physical characteristics of the component which gives consistent characteristics within a lot and lot-to-lot. The original design provides small size, excellent high-frequency performance and rugged construction for reliable automatic assembly. The Accu-L Inductor is particularly suited for the telecommunications industry where there is a continuing trend towards miniaturization and increasing frequencies. The Accu-L Inductor meets both the performance and tolerance requirements of present cellular frequencies 450MHz and 900MHz and of future frequencies, such as 1700MHz, 1900MHz and 2400MHz.

Features:
- High-Q • RF Power Capability • High SRF • Low DC Resistance • Ultra-Tight Tolerance on Inductance • Low Profile • Rugged Construction

Operating / Storage Temperature: -55°C ~ 125°C

TDK Inductors — MLK, MLF, GLC, GLF, MLG and MLZ Series

MLK Series: Supports operating frequency bands of up to 12GHz with nominal inductance values from 1 ~ 100nH. Provides high Q characteristics. Advanced monolithic structure is formed using a lamination and firing process with high-frequency ceramic and conductive materials. Because the part is non-polarized, it can be used in bulk cassette loaders. **Operating Temperature:** -25°C ~ 85°C **MLF Series - Magnetic Shielded Inductor:** TDK's MLF multi-layer chip inductor combines high performance with the most compact design available today. MLF inductor's multi-layer technology utilizes ferrite paste and electric conductor paste layered in a monolithic structure. Sintering of ferrite and electric conductors forms a perfect closed magnetic circuit and a magnetic shield. Magnetic shielding is ideally suited for high density circuit application in disk drives, personal computers, measuring equipment and telephone equipment. **Operating Temperature:** -25°C ~ 85°C **GLF Series: Features:** • Delivers low Rdc with high Idc • Construction supports bulk mounting **Applications:** Perfect coil for step-up circuits, step-down circuits and decoupling circuits for each set power supply circuit • Portable audio visual devices • Mobile communication devices • Information devices *(GLF1608)* • Amusement devices *(GLF1608)* **Operating Temperature:** -40ºC ~ 105ºC **GLCR and GLFR Series: Features:** • Delivers low Rdc with high Idc • Able to withstand high temperature reflows (260°C during peak) used in lead free soldering **Applications:** • Portable audio visual devices • Mobile communication devices • Information devices **Operating Temperature:** -40°C ~ 105°C **MLG Series:** Supports operating frequency bands of up to 10GHz with nominal inductance values from 0.6 ~ 390nH. Provides high Q characteristics. Advanced monolithic structure is formed using a lamination and firing process with high-frequency ceramic and conductive materials. **Operating Temperature:** *(MLG1005S, MLG0603S and MLG0603Q)* -55ºC ~ 125ºC; *(MLG1608)* -25°C ~ 85°C **MLZ Series:** This is a multi-layered inductor primarily designed for choking power lines. With one of the best resistance performance in the industry, this product delivers a significantly lower DC resistance value compared to our previous products. This reduces the loss at the power supply and contributes to power conservation **Applications**: Choke coil to use for DVC, DSC, MD, power supply circuit such as various module **Operating Temperature:** -55°C ~ 125°C

† For Tape and Reel part number, change 1-ND to 2-ND.

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

TDK Inductors — NLFC, NLV, NLHV, NLCV, FLF, NLFV, NLC, NL and CPL Series

Digi-Reel® RoHS COMPLIANT

NLFC Series: This product has good heat durability that withstands lead-free compatible reflow soldering conditions. Lead-free materials are used for the plating on the terminal. The NLFC series features magnetic shielding and is recommended for power supply line applications. DCR: ±30% **Operating Temperature:** -40°C ~ 85°C (-40°F ~ 185°F)

NLV Series: This product supports lead-free solder reflow condition. Lead-free materials are used to terminal plating. This product uses metal terminal, therefore it is high connection reliability. They are wire wound **Operating Temperature:** -40°C ~ 85°C (-40°F ~ 185°F)

NLCV Series: Lead-free materials are used to terminal plating in this product **Applications:** • Universal inductance circuit use • AV components • Car electronics • IT equipment This series is a large current type: 1.0 ~ 33 μH (NLCV32: 1.0 ~ 330 μH) DCR: ±30% **Operating Temperature:** -40°C ~ 85°C (-40°F ~ 185°F)

FLF Series: **Features:** • It delivers low Rdc with high Idc. • It is able to withstand high temperature reflows (260°C during the peak) used in lead-free soldering. **Applications:** • Information electrical appliance equipment (HDD) • Information electrical appliance equipment (W_LAN) • Portable Phone Equipment (Digital Cellular) • Portable AV Equipment (DSC, DVC, AUDIO, etc.) **Operating Temperature:** -40°C ~ 125°C (-40°F ~ 257°F)

NLHV Series: High Q-Factor is provided in frequency band more than 30MHz **Applications:** • Power supply lines • Audio visual systems • Electronic equipment for vehicles • IT equipment **Operating Temperature:** -40°C ~ 105°C (-40°F ~ 221°F)

NLFV Series: Provides low DC resistance while using 252018 size winding construction **Applications:** • PCs • Hard disk drives • Other types of electronics DCR: ±20%
Operating Temperature: -20°C ~ 85°C (-4°F ~ 185°F) **-PFR Series Operating Temperature:** -40°C ~ 125°C

NLC4532 Series: Designed to be used on power lines and support rated current in the range from 90 ~ 150mA. NLC Series has only half as much DC resistance and twice as much DC current.
Operating Temperature: -40°C ~ 105°C (-40°F ~ 221°F)

NL Series: Features good heat durability that withstands lead-free compatible reflow soldering conditions. Uses metal terminals, which realize excellent connection reliability **Applications:** • Electronic equipment used in communication infrastructures including xDSL and mobile base stations • Electronic equipment used in onboard automobile equipment including car audio and ECU systems • Audio visual equipment including TVs and VCRs • Other electronic equipment including HDDs and ODDs

CPL Series: Delivers low Rdc with high Idc and able to withstand high temperature reflows (260°C during the peak) used in lead-free soldering **Applications:** • Portable audio visual devices (DSCs and DVCs) • Mobile communication devices (cellular phones) • Information devices (PCs).
Operating Temperature: -40°C ~ 105°C (-40°F ~ 221°F)

TDK Inductors — VLP, SLF, RLF, SPM, VLCF, VLF and VLS Series

VLP Series:
This is a SMD power inductor for power supplies that has an open magnetic path construction based on a low-height drum core (upright). User terminals are contact-formed on the bottom of the drum core using copper (finished with tin plating). It uses crosswise windings and supports large currents.

SLF Series:
SLF series large current lead less inductors have been developed for SMD of power circuits. High performance ferrite core material and low-profile design, ensure superior characteristics and high reliability **Features:** • Low-profile SMD type • Magnetic shielded type suitable for high density mounting • Provided with embossed carrier tape packaging for automatic mounting machines • Only reflow soldering is applicable **Characteristics:** Sizes SLF6028, SLF7032, and SLF7045: Operating temperature is -20°C ~ 85°C; Size SLF10145: Operating temperature is -20°C ~ 90°C; Size 12565 and 12575: Operating temperature is -20°C ~ 105°C

RLF Series:
This series of inductors is designed for power circuits that require a low profile, low inductance and large current such as those used in notebook PC's **Features:** With the height at only 4.5mm and retaining the DC current superimposition characteristic, this inductor reduces DC resistance 20% to 50% lower than TDK's existing products **Applications:** Choke coils in power circuit of notebook computers, LCD, DVD, entertainment electronics, etc **Specifications:** • Operating Temperature Range: -20°C ~ 105°C • Storage Temperature Range: -40°C ~ 105°C

SPM Series:
Features: • Small footprint, low profile • High power handling capability • Small copper loss **Specifications:** • Operating Temperature Range: -40°C ~ 125°C (including self-temperature rise)

VLCF Series:
Features: • Miniature size • Generic use for portable DC to DC converter line • High magnetic shield construction should actualize high resolution for EMC protection **Specifications:** • Operating Temperature Range: -40°C ~ 105°C (including self-temperature rise)

VLF Series:
Features: • These are compact inductors for power line measuring at L2.6 x W2.8mm and 1mm in height, considerably smaller compared to inductors with comparable characteristics • They feature low coil resistance, making them suitable for large currents (e.g., 0.7A at 0.24Ω) • They offer an excellent shielding effect **Applications:** • For mobile phones, hard disk drives and DSCs **Specifications:** • Operating Temperature Range: -40°C ~ 105°C (including self-temperature rise)

VLS Series:
Features: • Miniature size • High magnetic shield construction should actualize high resolution for EMC protection **Applications:** • Generic use for portable DC to DC converter line • DVCs • DSCs • PDAs • LCD displays • Cellular phones • HDDs **Specifications:** • Operating Temperature Range: -40°C ~ 105°C (including self-temperature rise)

Inductors – TSL and SL Series Radial Leaded

TSL series:
The TSL series features low DC resistance and high current handling capacities, making them ideal for power supply line applications. These parts are manufactured to a high degree of dimensional accuracy using non-flammable material (UL94V-0). **Specifications:** • Operating temperature range: -40°C ~ 85°C (including self-temperature rise) **SL Series Features:** • Low RDC • Best for the power supply line **Specifications:** • Operating temperature range: -40°C ~ 85°C

AlfaMag Electronics

Inductors for National Simple Switcher™

Digi-Reel® RoHS COMPLIANT

Features:

- High energy storage with minimum saturation • High stability from no load to full load

Electrical specifications at 25°C Operating Temperature Range: -40°C ~ 125°C **Test Frequency:** Inductance measured at 10kHz/10mV

50kHz Inductors are compatible with National Simple Switcher part numbers LM2574, LM2475, and LM2576. Inductance will be typical for the I_{DC} and ET_{OP} values listed.

150kHz Inductors are compatible with National Simple Switcher part numbers LM259X-L1 through LM259X-L44 and LM258X-L.

★ For Tape and Reel part number, change CT-ND to TR-ND. † Simple Switcher is a trademark of National Semiconductor to be used for reference only.

‡ ET_{OP} for part number SH150C-4.50-19 is based on a frequency of 100kHz. All other items are rated at 150kHz.

TAIYO YUDEN Multilayer Chip Inductors

HK Series

Features:
- Multilayer inductor made of advanced ceramics with low-resistivity silver used as internal conductors provides excellent Q and SRF characteristics
- Designed to address surface mount inductor needs for applications above 100MHz
- Multilayer block structure ensures outstanding reliability, high productivity and product quality

Applications:
- Portable telephones, PHS and pagers
- Miscellaneous high-frequency circuits
- EMI countermeasure in high-frequency circuits

NEW! HKQ Series

Features: • Multilayer inductor made of advanced ceramics with low-resistivity silver used as internal conductors provides excellent Q and SRF characteristics • Designed to address surface mount inductor needs for applications above 500MHz • Multilayer block structure ensures outstanding reliability, high productivity and product quality
Applications: • Portable telephones, PHS and W-LAN • Miscellaneous high-frequency circuits • EMI countermeasure in high-frequency circuits

LK Series

Features: • Internal printed coil structure creates a closed magnetic circuit which acts as a magnetic shield eliminating crosstalk, thus permitting higher mounting densities • Multilayer block structure yields higher reliability

Applications: Any general circuit of portable equipment in which compact size and high mounting densities are required

CK Series

Features:

- Internal printed coil structure creates a closed magnetic circuit which acts as a magnetic shield eliminating crosstalk, thus permitting higher mounting densities • Multilayer block structure yields higher reliability

Applications:

- Separation of analog and digital circuits • Prevents interference between PLL and the other digital circuits

AQ Series

Features: • High Q and high SRF suitable for high frequency circuit • Excellent mount ability and heat resistance suitable for replacement of wire wound inductors • Monolithic structure provides high reliability

Applications: • Mobile telephone, wireless LAN • High frequency module • Tuner • High frequency circuits

TAIYO YUDEN

Wound Chip Power Inductors

CB Series

The CB Series wound chip inductors can be used for small DC/DC converters and are suited for choke uses.
Applications: • DSC/DVC/HDD • LCD • Portable telephones • Game equipment • Various audio-visual equipment • Various communication equipment

BR Series

The best efficiency design is achieved by adopting bottom-surface electrode structure. Small and low-profile wound chip inductors are suited for module design which needs high electric current like DC/DC converters.
Applications: • Small DC/DC converters in cell phones • HDD, DVC, DSC, PDA, LCD displays

LB Series

The LBMF Series wound chip inductor covers customers' wide range module design by wide-line-up shape, standard, low Rdc, and high electric current series. The LBM2016 Series High Q and narrow tolerance are achieved by adopting bottom-surface electrode structure. Wound chip inductors are suited for module design of signal line uses. The LBC Series has super high Idc and low Rdc characteristics. The LB/LBR Series features super low Rdc and high Idc characteristics.

Applications: • DSC/DVC/HDD • LCD • Portable telephones • Game equipment • Various audio-visual equipment • Various communication equipment

‡ For Tape and Reel part number, change 1-ND to 2-ND. † Low RDC Type

(Continued)

TAIYO YUDEN

Wound Chip Power Inductors *(Cont.)*

NR, NRH, NRG and NRS Series

Features:

• Small and low profile inductors • Corresponds to high current • Simple and original magnetic shield structure • Structure is strong against shock

Applications:

• Small DC/DC converters in cell phones • HDD, DVC, DSC, PDA, LCD displays

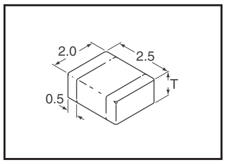
CKP Series Chip Inductors



Features:
- Low profile below 1.2mm
- Low DC power dissipation due to low RDC with high aspect ratio internal conductor

Applications:
- DC/DC converter for mobile equipment (Cellular phones, DSC, DVC)

TOKO

Low Dropout Voltage Regulators

Series TK112xxCM/TK113xxCM

The **TK112xxCM** is an integrated circuit with a silicon monolithic bipolar structure. The regulator is of the low saturation voltage output type with very little quiescent current (65µA). The PNP power transistor is built-in. The I/O voltage difference is 0.17V (typical) when a current of 200mA is supplied to the system. Because of the low voltage drop, the voltage source can be effectively used; this makes it very suitable for battery powered equipment. The on/off function is built into the IC. The over current sensor circuit and the reverse-bias protection circuit are built-in. It is a very rugged design because the ESD protection is high. Therefore, the TK112xxCM can be used with confidence.

The **TK113xxCM** series of low dropout (LDO) voltage regulators are designed for use in battery powered equipment, portable communication devices or RF modules requiring a thermal enhanced SOT23L-6 package. The maximum continuous current power rating is 380mA.

Specifications:

TK112xxCM: • Peak output current is 480mA (10% down point) • Built-in on/off control (0.1µA maximum standby current) High On • Supply Voltage: -0.4V ~ 16V • Operating Temperature: -30°C ~ 80°C • Line Regulation: 6mV • Maximum Output Current: 480mA • Quiescent Current: 65µA

TK113xxCM: • Active Low (Reference: Vin) On/Off Control • Output Current: 300mA (peak 480mA) • Supply Voltage: -0.4V ~ 16V • Operating Temperature: -30°C ~ 80°C • Line Regulation: 6mV • Maximum Output Current: 480mA • Quiescent Current: 1.8mA

Series TK111xxC/TK717xxS

The **TK111xxC** is an integrated circuit of the silicon monolithic bipolar structure, and the regulator of low saturation output type with very little quiescent current (63µA). The PNP power transistor is built-in. The I/O voltage difference when the current of 200mA (typical) is supplied to the system is 0.2V. The voltage source can be effectively used therefore, it is the best for the battery used type set. The on/off function is built into the IC. The current in standing-by mode becomes slight (pA level). 1.5V ~ 10.0V is arranged to the output voltage in 0.1V step. The output voltage is trimmed in high accuracy.

The **TK717xxS** is an integrated circuit with a silicon monolithic bipolar structure. The regulator is of the low saturation voltage output type with very little quiescent current. The PNP power transistor is built-in. The I/O voltage difference is 163mV (typical) when a current of 200mA is supplied to the system. Because of the low voltage drop, the voltage source can be effectively used; this makes it very suitable for battery powered equipment. The on/off function is built into the IC. The current during standby mode becomes very small (pA level). In addition, the output short-circuit function works at off times. It is a unique characteristic by which the residual charge of the output side capacitor is rapidly discharged.

Specifications:

TK111xxC: • Peak output current is 320mA (0.3V down point) • Built-in on/off control (0.1µA maximum standby current) High on • Supply Voltage: -0.4V ~ 16V • Operating Temperature: -30°C ~ 80°C • Line Regulation: 5mV • Maximum Output Current: 320mA • Quiescent Current: 1.0mA • Lead free

TK717xxS: • Built-in PNP power transistor. Very small Dropout Voltage (Vdrop=163mV at Iout=200mA) • Supply Voltage: -0.4V ~ 16V • Operating Temperature: -30°C ~ 80°C • Line Regulation: 5mV • Maximum Output Current: 370mA • Quiescent Current: 72µA

Fixed Inductors

RL622 Series:

Features: • High current capacity • Ferrite bobbin core • Low core loss • High reliability, high efficiency • Winding covered with shrink tubing • Operating temperature: -55°C ~ 105°C **Applications:** • Switch mode power supplies • DC-DC converters • Desktop, notebook computers, servers • Digital TV, DVD, cable modems, DSS set-top boxes • Battery chargers • Output chokes • EMI filters

RL822 Series:

Features: • High current capacity • Ferrite bobbin core • Low core loss • High reliability, high efficiency • Winding covered with shrink tubing • Operating temperature: -55°C ~ 105°C **Applications:** • Switch mode power supplies • DC-DC converters • Desktop, notebook computers, servers • Digital TV, DVD, cable modems, DSS set-top boxes • Battery chargers • Output chokes • EMI filters

RL824 Series:

Features: • High current capacity • Ferrite bobbin core • Low core loss • High reliability, high efficiency • Winding covered with shrink tubing • Operating temperature: -55°C ~ 105°C **Applications:** • Switch mode power supplies • DC-DC converters • Desktop, notebook computers, servers • Digital TV, DVD, cable modems, DSS set-top boxes • Battery chargers • Output chokes • EMI filters

Surface Mount Dual Toroid Inductors

The PM3602 and PM3604 Series are versatile surface mount coils that can provide different functions in a single package. A bifilar method is used in the winding of these coils. The user can utilize these coils in four different ways, depending on the external connection chosen:

(1) Parallel Connection: Doubles the current capacity

(2) Series Connection: 4 times the parallel inductance

(3) Dual Inductor: Creates two differential mode inductors

(4) 1:1 Ratio Transformer: For isolation and some flyback applications

Features:

- Toroidal core design to minimize RFI radiation • Low loss core material • Encapsulated in case for pick and place capability • Reflow soldering • Hi-pot 500V • Operating temperature: -55°C ~ 125°C

Typical Applications:

- Switching power supplies • Converters • Data communications • Processor/controller circuits • Personal computers • Filters

Series Mode

Parallel Mode

Series or parallel connections are made at the circuit level (not an internal connection of the device).

1:1 Transformer/
Dual Differential Mode

High Current Toroid Inductors

2100, 2200 and 2300 Series (Std., HT and LL)

2100, 2200, and 2300 Series: Features: • High current • Low radiation • 12.70mm lead length tinned to within 1.59mm of body • Operating Temperature: -55°C ~ 105°C **Typical Applications:** • DC-DC converters • EMI filters • Output Chokes **Notes:** • Rated Idc causes a 30°C temperature rise **2100LL and 2200LL Series: Features:** • Low core loss • Low magnetic radiation • High current capacity • Horizontal mount • Operating Temperature: -55°C ~ 125°C **Typical Applications:** • Switch mode power supplies • DC-DC converters • Output chokes • EMI filters **Notes:** • Rated Idc causes a 30°C temperature rise **2100HT, 2200HT and 2300HT Series: Features:** • High temperature rating, up to 200°C • Low magnetic radiation • High current capacity • Horizontal or vertical mount available • Low cost • Operating Temperature: -55°C ~ 200°C • 12.70mm lead length tinned to within 1.59mm of body **Notes:** • Rated Idc causes a 50°C temperature rise

Molded RF Chokes

RoHS COMPLIANT

9230 Series:

Form Length: 6.35mm; Form Diameter: 2.41mm; Lead Length: 38.10mm; Tolerance: ±10%

9250A Series:

Form Length: 10.41mm; Form Diameter: 4.11mm; Lead Length: 25.4mm; Tolerance: ±10%. The 9250A uses a ferrite compound for the shield, as opposed to the 9250 which uses a ferrite sleeve.

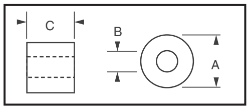
Ferrite Beads



The addition of a Ferrite Bead to a piece of wire causes the impedance of the lead to increase and acts like a small RF choke at high frequencies.
It is possible to dissipate high frequency parasitic signals and attenuate undesirable frequencies that travel on DC circuits by the use of beads.

ABRACON CORPORATION
The Power of Linking Together

NEW! SMD Thin Film Chip Inductors

Features:
- A photo-lithographic single layer ceramic chip • High SRF; Excellent Q • Superior Temperature Stability • Tight Tolerance of ±1% or ±0.1nH • Self Resonant Frequency Control within 10% • Stable Inductance in High Frequency Circuit • Highly Stable Design for Critical Needs

Applications:
- Cellular Telephones • Pagers and GPS Products • Wireless LAN • Bluetooth Module • VCO, TCXO Circuit and RF Transceiver Modules • Communication Appliances

Specifications:
- Operating Temperature: -25°C ~ 85°C • Storage Temperature: 25 ±3°C; Humidity <80%RH

NEW! SMD Power Inductors

Features:
- Magnetic shielding • Very small footprint • Flat-top for pick and place • Increased size selection guide

Applications:
- Ideal for Palm-Top and Laptop DC-DC converters • PDA's flash memory • Step-up, step-down converters

Specifications:
- Operating Temperature: -40°C ~ 125°C

ABRACON CORPORATION
The Power of Linking Together

NEW! SMD Ceramic Wire-Wound Chip Inductors

Features: • Ceramic or Ferrite construction assures the utmost thermal stability and high SRF • Exceptionally high Q compared to non-wirewound inductors, especially at high frequencies

Applications: • Widely applied in VCO, SAW circuit for GSM and CDMA communication • Used in hard disk, notebook computers and other electronic equipment

Specifications: • Operating Temperature: *AISC-0402 and AISC-0603*: -25°C ~ 85°C; *AISC-0805(F) and AISC-1008(F)*: -25°C ~ 125°C • Storage Temperature: -25°C ~ 85°C; 70% RH Max.

RF Wide Band Balun Transformers

The Pulse balun transformer offers an excellent insertion loss device in a low cost SMT format. The RF Baluns are ideal for balanced to unbalanced applications and have been designed for applications such as CATV Distribution/Drop Amplifiers, Set Top Boxes and Home Gateways.

Operating Temperature: -40°C ~ 85°C

3 Terminal EMI Filters

The regulations for electromagnetic noise are becoming tighter in many countries due to its influence on the human body. Under these circumstances, Rohm's EMI filter (low internal resistance, three-terminal, 1.6x0.8mm 0603 size) is a solution. It can cancel the differential-mode noise on the board complying with a large current of 4A in the power supply. Various capacitances are in the lineup that enable noise cancellation at the frequency band.

Specifications:

Panasonic® Hybrid Passive RF/Microwave Devices

Note: All drawings are top view.

These components are suited for Mobile Phones (Handsets/Base Stations), Navigation Devices (GPS), Pagers, Mobile Computing (PCs and PDAs), Mobile Data Terminals, Wireless Microphones, Cordless Phones and Wireless Local Area Network (WLAN) applications.

SPECIFICATIONS: • Operating Temperature: -30°C ~ 85°C **• Soldering:** 230°C for 5 seconds

BALUN: Ultra small, thin, high precision, with ultra-fine geometry baluns to meet your single-ended to double-ended to electronic circuitry interface requirements **Application:** Single/Double Ended Mixer, Differential Amp, Matching.

DIRECTIONAL COUPLER: Miniaturized, high coupling efficiency, low-cost, with ultra-fine geometry directional couplers to meet your most demanding coupling needs **Application:** To control transmitted power.

DIRECTIONAL COUPLER with LC FILTER: A directional coupler having the above same features and benefits, but also incorporating an LC Filter **Application:** To control transmitted power while suppressing spurious noise.

POWER DIVIDER: Miniaturized, high efficiency/low-loss, with ultra-fine geometry, three port power divider to meet your circuitry power handling requirements **Application:** To divide internal signals (ex. VCO).

† Bulk Package ‡ For Tape and Reel part number, change CT-ND to TR-ND.

Digi-Reel® Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Midcom **WÜRTH ELEKTRONIK**

WE-FI Series — Leaded Toroidal Line Chokes

RoHS COMPLIANT

Features:

- High storage capacity
- Iron powder cores with low losses
- Low magnetically leakage field

Applications:

- Application in voltage transformers and power supplies
- For interference frequencies up to 10MHz
- Perfect for filtering of symmetric interferences

WE-CMB Series — Current Compensated Chokes

RoHS COMPLIANT

Features:

- With this product you can achieve high suppression of asymmetric interferences even at low frequency ranges
- Broadband interference suppression because of low capacitance winding technique
- Very compact design
- Best possible current at small size

Applications:

- Power electronics
- Power line input and output filter
- For filtering of devices without a stable ground connection
- Radio interference suppression in motors

WE-CNSW Series — SMD Common Mode Noise Suppressor

RoHS COMPLIANT

Features:

- High common mode suppression at high frequency
- Operating temperature: -40°C ~ 125°C
- Recommended solder profile: Reflow

Applications:

- USB 2.0
- Firewire/IEEE 1394
- LVDS
- High Speed Data Lines
- Common Mode Filters

Midcom WÜRTH ELEKTRONIK

WE-FC Series — Current Compensated Chokes

Features:
- Closed rectangular ferrite core
- 2-section winding for excellent high frequency performance
- 1% stray inductance for symmetrical interference suppression
- Rated voltage of 250VAC
- Operating temperature: -25°C ~ 125°C
- Isolation voltage: 2000VAC

Applications:
- Switch mode power supplies
- Electronic ballasts for lamps

Dimensions in mm

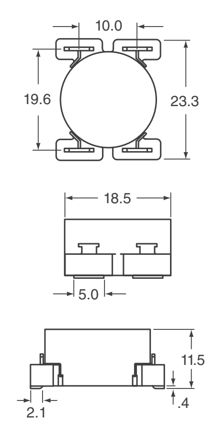
WE-LF Series — SMD Current Compensated Power Line Chokes

Dimensions in mm



Features:
- Compact size
- Toroidal core with sector winding
- High attenuation of common mode interferences in low and middle frequency range
- Operating voltage: 250VAC

Applications:
- Mains filter
- Power electronics
- SMPS

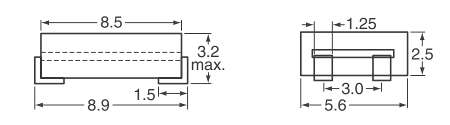
† For Tape and Reel part number, change 1-ND to 2-ND.

NEW! WE-CMS Series — SMD Common Mode Line Filter

Dimensions in mm



Features:
- This common mode SMD bead suppresses interferences effective on data lines within the same frequency range.
- Maximum current capability up to 5A
- Low DC resistance with 3mΩ

Applications:
- Power Supply Systems
- Symmetric data lines

Impedance (Ω) @100MHz	DCR Max. (Ω)	Rated Current (A)	Digi-Key Part No.	Cut Tape Price Each 1	25	100	Digi-Key Part No.	Tape and Reel Pricing 2,400	Würth Part No.

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Midcom WÜRTH ELEKTRONIK

Locking Clamp-On Ferrites for Cable Assembly
STAR-FLAT, STAR-TEC, STAR-RING, STAR-FIX and STAR-GAP Series

RoHS COMPLIANT

STAR-FLAT, STAR-TEC, STAR-RING and STAR-FIX Series:

Features: • Prefixing cable system for easy assembling of the snap ferrite • Patented case design prevents air gaps for a perfect EMI suppression • The security lock guarantees electromagnetic compatibility because only authorized persons can unlock the snap ferrite with the STAR-TEC key • The innovative sleek design without any sharp edges makes the ferrite blend in on the cable • Operating temperature: -25°C ~ 105°C

STAR-GAP Series:

Features: • Worldwide first split case ferrite with 'defined air-gap' (patented) • Especially helpful for EMI problems in frequency range of 100MHz up to 2.5GHz • Data signals up to 100MHz will not be effected • Best performance (impedance) especially with 2 windings • Low magnetic saturation of the material in cases of high DC current applications which therefore gives a low reduction of impedance in comparison to other manufacturers • Pre-fixing and cable protection system is time saving and makes it easier to assemble • Not possible to remove from the cable without the WE key • Non visible locking in closed conditions • Unique and handy case design • With each packing unit you get one WE key for free • With 0.8mm air gap • Material of the plastic case: PA 6, UL94V-0 • Operating temperature: -25°C ~ 105°C

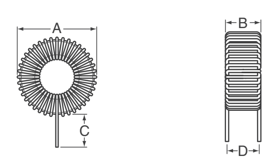
NEW! WE-SI Series — Leaded Toroidal Storage Chokes

RoHS COMPLIANT



Features:

- Low magnetic stray field
- Low leakage and minimal noise because of the toroidal core made of iron powder

Applications:

- Used in switching power supplies and voltage transformers
- DC/DC converter up to 100kHz

EMI Suppression Toroidal Ferrite Cores

RoHS COMPLIANT

Features:

- Ferrite core made of NiZn, a material which works in a broadband frequency range
- Many different types and grades of material (NiZn) for the best possible interference suppression

Applications:

- Wires
- Coaxial cables
- Wire-wrapping cables
- Multiconductor wires
- Power supplies
- Data and gage signal lines

NEW! Ferrite Suppressors

RoHS COMPLIANT

Features:

- Filter for common mode or differential mode
- High impedance common mode inductor with 2x2 windings made by PCB line connection
- High rated current with typical 4A
- Broadband filtering because of the NiZn-ferrite core
- RF-common mode indicator for 2, 3 or 4 lines in one component

Applications:

- Suitable for absorption of common or differential mode interferences in the field of EMC
- High-current DC output filters of power supplies, such as battery charges, industrial power supplies
- With one turn, performs like a 3 or 4 times common mode choke for the signal

NEW! WE-PBF Series — SMD EMI Suppression Ferrite Beads

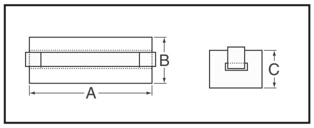
Digi-Reel® RoHS COMPLIANT

Features:

- Flat wire SMD ferrite with high current capacity
- Max. Current Rating: 6.0A

Applications:

- Voltage supply for high load current



Impedance (Ω) with 1 Turn @100MHz	RDC Max. (mΩ)	Dimensions — mm A	B	C	Digi-Key Part No.	Cut Tape Pricing 1	25	100	Tape and Reel Pricing† 500	Würth Part No.

† For Tape and Reel part number, change 1-ND to 2-ND.

WE-CBF Series — SMD EMI Suppression Ferrite Beads

Features:

- The special SMD chip bead ferrites can be put directly on the printed circuit board
- These parts offer excellent anti-EMI properties and low DC-resistance
- Reliable Ni-Sn electrodes
- Perfect as data lined filter and for uncoupling of distribution voltage
- Highly extended spectrum
- Recommended soldering: Reflow

† For Tape and Reel part number, change 1-ND to 2-ND. ✔ ***NEW!***

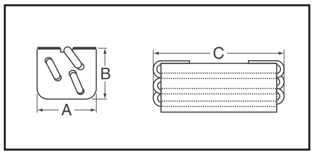
NEW! WE-SUKW Series — SMD EMI Suppression 5-Hole Ferrite Beads

Features:

- Max. Current Rating: 5A
- Low DC resistance with 3mΩ
- SMD version for easy installation on the PCB

Applications:

- Protection against radio frequency interferences of components on PCB's of PC's, text processing and other digital devices
- Typical in power supplies
- Power electronics



Impedance (Ω) with 2.5 Turns @100MHz	Dimensions — mm A	B	C	Digi-Key Part No.	Cut Tape Pricing 1	25	100	Tape and Reel Pricing† 1,000	Würth Part No.

† For Tape and Reel part number, change 1-ND to 2-ND.

Most SMT cutdown parts are available on a Digi-Reel®. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key® Services on page 2 for additional information.

Corcom Feedthrough Filters and Capacitors

Filters – FFA and FFD Series

All parts are UL and CSA approved.

The FFA and FFD series are designed to meet the very stringent safety requirements of EN132400 class Y4 and the class Y2

Specifications: • UL94V-0 Rated • Category Temperature Range: -40°C ~ 85°C • Insulation Resistance: For C<0.33µF, R>15000MΩ / For C>0.33µF, RC(MΩ*µF) >5000s • MTBF: Typically >5 million hours

FFA Series (Class Y2): • Rated Voltage: 250VDC 50/60 Hz maximum • Test Voltage (two seconds): 5000VDC • Operating Ambient Temperature Range: 10 ~ 100 Amps: -40°C ~ 60°C; 200 Amps: -40°C ~ 50°C; 250 and 300 Amps: -40°C ~ 40°C • Pulse Test (EN132400): 5000V Peak

FFD Series (Class Y4): • Rated Voltage: 130VDC maximum • Test Voltage (two seconds): 2500VDC • Operating Ambient Temperature Range: -40°C ~ 60°C • Pulse Test (EN132400): 2500V Peak
